

**B18008. SEX BY AGE BY EMPLOYMENT DISABILITY FOR THE CIVILIAN  
NONINSTITUTIONALIZED POPULATION 16 TO 64 YEARS - Universe: CIVILIAN  
NONINSTITUTIONALIZED POPULATION 16 TO 64 YEARS**

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	423,393	419,735	427,051
Male:	210,720	208,267	213,173
16 to 20 years:	27,701	24,985	30,417
With an employment disability	910	317	1,503
No employment disability	26,791	24,267	29,315
21 to 64 years:	183,019	180,317	185,721
With an employment disability	11,322	9,789	12,855
No employment disability	171,697	168,555	174,839
Female:	212,673	209,022	216,324
16 to 20 years:	25,629	23,517	27,741
With an employment disability	570	153	987
No employment disability	25,059	22,913	27,205
21 to 64 years:	187,044	184,704	189,384
With an employment disability	14,037	12,288	15,786
No employment disability	173,007	170,550	175,464

Source: U.S. Census Bureau, 2004 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the [ACS Subject Definitions](#) for Disability.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to [Labor Force Guidance](#).

**Explanation of Symbols:**

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
