

# B18001. SEX BY AGE BY NUMBER OF DISABILITIES FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER - Universe: CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER

Data Set: [2006 American Community Survey](#)

Survey: 2006 American Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

Alaska		
	Estimate	Margin of Error
Total:	605,065	+/-1,896
Male:	305,857	+/-2,086
5 to 15 years:	57,595	+/-1,407
Without any disability	53,858	+/-1,557
With one type of disability	3,053	+/-758
With two or more types of disability	684	+/-385
16 to 20 years:	28,227	+/-2,183
Without any disability	25,673	+/-2,172
With one type of disability	1,196	+/-478
With two or more types of disability	1,358	+/-667
21 to 64 years:	200,259	+/-2,423
Without any disability	169,534	+/-3,648
With one type of disability	17,205	+/-2,053
With two or more types of disability	13,520	+/-1,553
65 to 74 years:	12,918	+/-506
Without any disability	7,323	+/-883
With one type of disability	3,317	+/-756
With two or more types of disability	2,278	+/-583
75 years and over:	6,858	+/-571
Without any disability	3,184	+/-560
With one type of disability	1,511	+/-360
With two or more types of disability	2,163	+/-566
Female:	299,208	+/-1,647
5 to 15 years:	51,951	+/-1,390
Without any disability	49,272	+/-1,517
With one type of disability	2,087	+/-767
With two or more types of disability	592	+/-366
16 to 20 years:	25,907	+/-1,993
Without any disability	24,567	+/-1,909
With one type of disability	978	+/-433
With two or more types of disability	362	+/-270
21 to 64 years:	198,051	+/-1,885
Without any disability	169,092	+/-3,030
With one type of disability	11,879	+/-1,596
With two or more types of disability	17,080	+/-2,452
65 to 74 years:	13,062	+/-662
Without any disability	8,364	+/-930
With one type of disability	2,922	+/-725
With two or more types of disability	1,776	+/-498
75 years and over:	10,237	+/-779
Without any disability	3,571	+/-863
With one type of disability	2,134	+/-574
With two or more types of disability	4,532	+/-880

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the [ACS Subject Definitions](#) for Disability.

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

**Explanation of Symbols:**

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

**Standard Error/Variance documentation for this dataset:**
