

PCT038C. AGE BY TYPES OF DISABILITY FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER WITH DISABILITIES (AMERICAN INDIAN AND ALASKA NATIVE ALONE) - Universe: TOTAL DISABILITIES TALLIED FOR THE CIVILIAN NONINSTITUTIONALIZED AMERICAN INDIAN AND ALASKA NATIVE ALONE POPULATION 5 YEARS AND OVER WITH DISABILITIES

Data Set: [2003 American Community Survey Summary Tables](#)

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total disabilities tallied:	36,907	31,728	42,086
Total disabilities tallied for people 5 to 15 years:	3,286	2,213	4,359
Sensory disability	260	0	630
Physical disability	557	0	1,120
Mental disability	2,410	1,763	3,057
Self-care disability	59	0	160
Total disabilities tallied for people 16 to 64 years:	21,592	17,971	25,213
Sensory disability	3,587	2,403	4,771
Physical disability	5,955	3,514	8,396
Mental disability	3,248	2,704	3,792
Self-care disability	1,826	1,194	2,458
Go-outside-home disability	2,493	1,727	3,259
Employment disability	4,483	3,374	5,592
Total disabilities tallied for people 65 years and over:	12,029	6,465	17,593
Sensory disability	2,957	781	5,133
Physical disability	4,272	2,504	6,040
Mental disability	1,538	383	2,693
Self-care disability	1,125	655	1,595
Go-outside-home disability	2,137	1,543	2,731

### Notes

The 2003 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change affected mostly the two items measuring go-outside-home disability and employment disability. Accordingly, trend analysis using year 2003 and prior years is not recommended for the relevant questions.

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '\*\*\*' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
