B18020. DISABILITY STATUS BY SEX BY AGE BY EMPLOYMENT STATUS FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 16 TO 64 YEARS - Universe: CIVILIAN NONINSTITUTIONALIZED POPULATION 16 TO 64 YEARS

Data Set: 2004 American Community Survey

Survey: American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

« hide upper and lower bounds

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	423,393	419,735	427,051
With a disability:	57,090	53,338	60,842
Male:	29,351	27,241	31,461
16 to 34 years:	8,610	7,142	10,078
Employed	4,174	3,026	5,322
Not employed	4,436	3,546	5,326
35 to 64 years:	20,741	19,190	22,292
Employed	10,008	8,773	11,243
Not employed	10,733	9,419	12,047
Female:	27,739	24,643	30,835
16 to 34 years:	6,481	5,242	7,720
Employed	3,273	2,221	4,325
Not employed	3,208	2,480	3,936
35 to 64 years:	21,258	18,384	24,132
Employed	8,681	7,099	10,263
Not employed	12,577	10,799	14,355
No disability:	366,303	362,378	370,228
Male:	181,369	177,937	184,801
16 to 34 years:	69,707	67,322	72,092
Employed	47,251	45,092	49,410
Not employed	22,456	20,231	24,681
35 to 64 years:	111,662	109,792	113,532
Employed	91,262	89,087	93,437
Not employed	20,400	18,522	22,278
Female:	184,934	181,636	188,232
16 to 34 years:	76,745	74,020	79,470
Employed	50,141	45,512	54,770
Not employed	26,604	23,739	29,469
35 to 64 years:	108,189	105,617	110,761
Employed	79,521	76,127	82,915
Not employed	28,668	25,845	31,491

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the ACS Subject Definitions for Disability.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Explanation of Symbols:
1. An '*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An '**' entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
