

B18020C. DISABILITY STATUS BY SEX BY AGE BY EMPLOYMENT STATUS FOR THE CIVILIAN NONINSTITUTIONALIZED POPULATION 16 TO 64 YEARS (AMERICAN INDIAN AND ALASKA NATIVE ALONE) - Universe: AMERICAN INDIAN AND ALASKA NATIVE ALONE CIVILIAN NONINSTITUTIONALIZED POPULATION 16 TO 64 YEARS

Data Set: [2005 American Community Survey](#)

Survey: 2005 American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska		
	Estimate	Margin of Error
Total:	55,745	+/-2,064
With any disability:	11,271	+/-1,330
Male:	5,720	+/-1,011
16 to 34 years:	1,416	+/-516
Employed	519	+/-342
Not employed	897	+/-362
35 to 64 years:	4,304	+/-780
Employed	1,630	+/-414
Not employed	2,674	+/-702
Female:	5,551	+/-800
16 to 34 years:	997	+/-332
Employed	488	+/-202
Not employed	509	+/-262
35 to 64 years:	4,554	+/-766
Employed	1,736	+/-516
Not employed	2,818	+/-586
No disability:	44,474	+/-1,849
Male:	22,123	+/-1,347
16 to 34 years:	10,708	+/-927
Employed	5,165	+/-966
Not employed	5,543	+/-832
35 to 64 years:	11,415	+/-1,023
Employed	7,335	+/-1,002
Not employed	4,080	+/-618
Female:	22,351	+/-1,138
16 to 34 years:	10,876	+/-789
Employed	4,821	+/-718
Not employed	6,055	+/-737
35 to 64 years:	11,475	+/-841
Employed	7,908	+/-865
Not employed	3,567	+/-708

Source: U.S. Census Bureau, 2005 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the [ACS Subject Definitions](#) for Disability.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to [Labor Force Guidance](#).

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
