¹Percentage of beds occupied (number of nursing home residents per 100 nursing home beds).

²Number of nursing home residents (all ages) per 1,000 resident population 85 years of age and over. Resident rates for 1995–1999 are based on population estimates projected from the 1990 census. Starting with 2000 data, resident rates are based on the 2000 census and postcensal population estimates. Available from: www.census.gov/popest/datasets.html.

NOTES: An error in the 2005 data file of the number of beds in Kansas was corrected. This affected the number of beds for Kansas, the West North Central division, and United States and the occupancy rates for these areas. See [Appendix I, Online Survey Certification and Reporting Database \(OSCAR\)](#). Annual numbers of nursing homes, beds, and residents are based on a 15-month OSCAR reporting cycle. Data for additional years are available. See [Appendix III](#).

SOURCES: Cowles CM ed., 2005 Nursing Home Statistical Yearbook. McMinnville, OR: Cowles Research Group, 2006 and previous editions; and Cowles Research Group, unpublished data. Based on data from the Centers for Medicare & Medicaid Services' Online Survey Certification and Reporting (OSCAR) database.
