Oregon	21	25	41	60	68	97	56	61	7.7	8.1	–20.7
Washington	18	30	43	66	79	88	91	94	10.2	6.7	3.4

-- Data not available.

¹Data are shown for Bureau of Economic Analysis (BEA) regions that are constructed to show economically interdependent states. These BEA geographic divisions differ from U.S. Census Bureau geographic divisions shown in some *Health, United States* tables. See [Appendix II, Geographic region and division](#).

²Transfer of St. Elizabeths Hospital from the National Institute of Mental Health to the District of Columbia Office of Mental Health took place over the years 1985–1993.

³Minnesota data for 1981 are not comparable with subsequent data. Average annual percent change is for 1983–1990.

NOTES: Expenditures are for mental illness, excluding mental retardation and substance abuse. Starting in 1990, data for Puerto Rico and starting in 1993, data for Guam are included in the U.S. total. States may vary in type of funds included in mental health expenditures. Medicaid revenues for community programs and children’s mental health expenditures are not included by some states. Funds for mental health services in jails or prisons are included by some states. State data omissions and inclusions are likely to be consistent across years. Data for additional years are available. See [Appendix III](#).
