

Table 105-0030^{1,2,6,7}

Alcohol dependence, by age group and sex, household population aged 12 and over, Canada, provinces, territories, health regions (January 2000 boundaries) and peer groups, every 2 years

Survey or program details:

Canadian Community Health Survey - [3226](#)

Alcohol dependence, by age group and sex, every 2 years

Symbol legend:

E
Use with caution
F
Too unreliable to be published

Footnotes:

- Source: Statistics Canada, Canadian Community Health Survey, 2000/2001
- Population aged 12 and over who answered a series of nine questions designed to measure the probability of having a drinking problem.
- Bootstrapping techniques were used to produce the coefficient of variation (CV) and 95% confidence intervals (CIs).
- Data with a coefficient of variation (CV) from 16.6% to 33.3% are identified by an (E) and should be interpreted with caution.
- Data with a coefficient of variation (CV) greater than 33.3% were suppressed (F) due to extreme sampling variability.
- Health regions are defined by provincial governments as the areas of responsibility for regional health boards (legislated) or as regions of interest to health care authorities.
- A "peer group" is a grouping of health regions that have similar social and economic characteristics.
- The following standard symbols are used in this Statistics Canada table: (...) for figures not available for a specific reference period and (...) for figures not applicable.
