Symbol legend:

^E Use with caution

F Too unreliable to be published

Footnotes:

1. Source: Statistics Canada, Canadian Community Health Survey, 2000/2001
2. Former smokers aged 12 and over who reported the number of years since they quit smoking.
3. Former smokers are those who previously smoked either daily or occasionally and are now non-smokers.
4. If a respondent answered between 2 and 3 years, the response was rounded to the nearest year.
5. Bootstrapping techniques were used to produce the coefficient of variation (CV) and 95% confidence intervals (CIs).
6. Data with a coefficient of variation (CV) from 16.6% to 33.3% are identified by an (E) and should be interpreted with caution.
7. Data with a coefficient of variation (CV) greater than 33.3% were suppressed (F) due to extreme sampling variability.
8. Health regions are defined by provincial governments as the areas of responsibility for regional health boards (legislated) or as regions of interest to health care authorities.
9. A "peer group" is a grouping of health regions that have similar social and economic characteristics.
21. The following standard symbols are used in this Statistics Canada table: (..) for figures not available for a specific reference period and (...) for figures not applicable.
