

Table 105-0427¹

Type of smoker, by age group and sex, household population aged 12 and over, Canada, provinces, territories, health regions (June 2005 boundaries) and peer groups, every 2 years

Survey or program details:

Canadian Community Health Survey - [3226](#)

Geography^{2,3}=Yukon Territory [60]

Age group	Sex	Type of smoker ¹⁰	Characteristics ^{15,16,17,18}	2005
Total, 12 years and over	Both sexes	Total population for the variable type of smoker	Number of persons	27,188
			Percent	100.0
		Current daily or occasional smoker ¹¹	Number of persons	8,257
			Percent	30.4
		Daily smoker ¹²	Number of persons	6,977
			Percent	25.7
		Occasional smoker ¹³	Number of persons	1,281 ^E
			Percent	4.7 ^E
		Former smoker ¹⁴	Number of persons	9,497
			Percent	34.9
		Never smoked	Number of persons	9,419
			Percent	34.6
		Type of smoker, not stated	Number of persons	F
			Percent	F
	Males	Total population for the variable type of smoker	Number of persons	13,664
			Percent	100.0
		Current daily or occasional smoker ¹¹	Number of persons	4,457
			Percent	32.6
		Daily smoker ¹²	Number of persons	3,815
			Percent	27.9
		Occasional smoker ¹³	Number of persons	642 ^E
			Percent	4.7 ^E
		Former smoker ¹⁴	Number of persons	5,036
			Percent	36.9

Symbol legend:

^E Use with caution

F Too unreliable to be published

Footnotes:

1. Source: Statistics Canada, Canadian Community Health Survey (CCHS 3.1), 2005. The CANSIM table 105-0427 is an update of CANSIM table 105-0227.
2. Health regions are defined by the provincial ministries of health. These are legislated administrative areas in all provinces. The health regions presented in this table are based on boundaries and names in effect as of June 2005. For complete Canadian coverage, each of the northern territories also represents a health region.
3. A "peer group" is a grouping of health regions that have similar social and economic characteristics. The nine peer groups are identified by the letters A through I, which are appended to the health region 4-digit code.
10. Population aged 12 and over who reported being either a current smoker (daily or occasional) or a non-smoker (former or never smoked). "Type of smoker" was previously referred to as "Smoking status".
11. Current smokers are those who smoke on either a daily or an occasional basis.
12. Daily smokers refers to those who reported smoking cigarettes every day.
13. Occasional smokers refers to those who reported smoking cigarettes occasionally. This includes former daily smokers who now smoke occasionally.
14. Former smokers are those who previously smoked either daily or occasionally and are now non-smokers.
15. When comparing estimates, it is important to use confidence intervals to determine if differences between values are statistically significant. Confidence intervals describe sampling variability and give an indication of the precision of a given estimate.
16. Bootstrapping techniques were used to produce the coefficient of variation (CV) and 95% confidence intervals (CIs).
17. Data with a coefficient of variation (CV) from 16.6% to 33.3% are identified as follows: (E) use with caution.
18. Data with a coefficient of variation (CV) greater than 33.3% were suppressed due to extreme sampling variability and are identified as follows: (F) too unreliable to be published.
