

Table 105-0445<sup>1</sup>

Influenza immunization, by age group and sex, household population aged 12 and over, Canada, provinces, territories, health regions (June 2005 boundaries) and peer groups, every 2 years

Survey or program details:

Canadian Community Health Survey - [3226](#)

Geography<sup>2,3</sup>=Northwest Territories [61]

Age group	Sex	Influenza immunization <sup>10</sup>	Characteristics <sup>11,12,13,14</sup>	2005
Total, 12 years and over	Both sexes	Total population for the variable influenza immunization	Number of persons	34,664
			Percent	100.0
		Influenza immunization, less than one year ago	Number of persons	12,582
			Percent	36.3
		Influenza immunization, 1 or more years ago	Number of persons	7,107
			Percent	20.5
		Never had influenza immunization	Number of persons	14,015
			Percent	40.4
		Influenza immunization, not stated	Number of persons	960 <sup>E</sup>
			Percent	2.8 <sup>E</sup>
	Males	Total population for the variable influenza immunization	Number of persons	18,070
			Percent	100.0
		Influenza immunization, less than one year ago	Number of persons	5,475
			Percent	30.3
		Influenza immunization, 1 or more years ago	Number of persons	4,061
			Percent	22.5
		Never had influenza immunization	Number of persons	7,883
			Percent	43.6
		Influenza immunization, not stated	Number of persons	651 <sup>E</sup>
			Percent	3.6 <sup>E</sup>
	Females	Total population for the variable influenza immunization	Number of persons	16,594
			Percent	100.0
		Influenza immunization, less than one year ago	Number of persons	7,108
			Percent	42.8
		Influenza immunization, 1 or more years ago	Number of persons	3,045
			Percent	18.4
		Never had influenza immunization	Number of persons	6,132
			Percent	37.0
		Influenza immunization, not stated	Number of persons	F
			Percent	F
	Both sexes	Total population for the variable influenza immunization	Number of persons	5,716
			Percent	100.0
		Influenza immunization, less than one year ago	Number of persons	2,027 <sup>E</sup>
			Percent	35.5 <sup>E</sup>
		Influenza immunization, 1 or more years ago	Number of persons	994 <sup>E</sup>
			Percent	17.4 <sup>E</sup>
		Never had influenza immunization	Number of persons	2,009
			Percent	35.1
		Influenza immunization, not stated	Number of persons	687 <sup>E</sup>
			Percent	12.0 <sup>E</sup>
		Total population for the variable influenza immunization	Number of persons	2,987
			Percent	100.0
		Influenza immunization, less than one year ago	Number of persons	943 <sup>E</sup>

12 to 19 years	Males		Percent	31.6 <sup>E</sup>

#### Symbol legend:

<sup>E</sup> Use with caution

F Too unreliable to be published

#### Footnotes:

- Source: Statistics Canada, Canadian Community Health Survey (CCHS 3.1), 2005. The CANSIM table 105-0445 is an update of CANSIM table 105-0245.
- Health regions are defined by the provincial ministries of health. These are legislated administrative areas in all provinces. The health regions presented in this table are based on boundaries and names in effect as of June 2005. For complete Canadian coverage, each of the northern territories also represents a health region.
- A "peer group" is a grouping of health regions that have similar social and economic characteristics. The nine peer groups are identified by the letters A through I, which are appended to the health region 4-digit code.
- Population aged 12 and over who reported when they had their last influenza immunization (flu shot).
- When comparing estimates, it is important to use confidence intervals to determine if differences between values are statistically significant. Confidence intervals describe sampling variability and give an indication of the precision of a given estimate.
- Bootstrapping techniques were used to produce the coefficient of variation (CV) and 95% confidence intervals (CIs).
- Data with a coefficient of variation (CV) from 16.6% to 33.3% are identified as follows: (E) use with caution.
- Data with a coefficient of variation (CV) greater than 33.3% were suppressed due to extreme sampling variability and are identified as follows: (F) too unreliable to be published.
