**Symbol legend:**

(T) Series is terminated

**Footnotes:**

1. Source: Statistics Canada, Canadian Vital Statistics, Death Database
2. Death refers to the permanent disappearance of all evidence of life at any time after a live birth has taken place. Stillbirths are excluded.
3. In Quebec, deaths in residential and long-term care centres are included in "hospital" category.
4. The category "Place of death, non-hospital" includes deaths that occurred in private homes, in health care institutions such as nursing homes and other long-term care facilities, nursing stations and other short-term care facilities and other health care facilities not licensed to operate as hospitals by provincial, territorial or federal governments and at other specified sites.
5. The geographic distribution of deaths in this table is based on the deceased's usual place of residence.
6. Nunavut and the Northwest Territories (excluding Nunavut) came into existence on April 1, 1999. Data for these two territories are shown combined and separated for 1999 and separated from 2000 on. Historical data prior to 1999 are shown for the two territories combined as the "Northwest Territories including Nunavut" series; it was terminated in 1999. The vital statistics data that pertain to these territories for 1999 were previously published on the basis of the legal definition of each territory, as per the date of the event. Vital events for Nunavut that occurred before April 1, 1999 were tabulated with those of the Northwest Territories; only those events that occurred from April 1, 1999 on were tabulated separately. See the paper versions of the following publications for data year 1999: catalogue numbers 84F0001XPB, 84F0210XPB, 84F0211XPB, 84F0208XPB and 84F0209XPB.
7. Northwest Territories excluding Nunavut.
8. The following standard symbols are used in this Statistics Canada table: (..) for figures not available for a specific reference period, (...) for figures not applicable and (x) for figures suppressed to meet the confidentiality requirements of the Statistics Act.
9. The category "Unknown province or territory" refers to deaths of residents of Canada with province or territory of residence unknown. Starting with the 2010 data year, province or territory of residence is imputed where unknown.
11. During the production of each year's birth/death/stillbirth statistics, data from previous years may be revised to reflect any updates or changes that have been received from the provincial and territorial vital statistics registrars.
