

**[B01001C. SEX BY AGE \(AMERICAN INDIAN AND ALASKA NATIVE ALONE\) - Universe: AMERICAN INDIAN AND ALASKA NATIVE ALONE POPULATION](#)**

Data Set: [2007 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, the American Community Survey is part of the American Community Survey Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methods](#).

	<b>Alaska</b>	
	Estimate	Margin of Error
Total:	92,058	+/-3,176
Male:	45,621	+/-2,459
Under 5 years	4,157	+/-560
5 to 9 years	3,618	+/-472
10 to 14 years	3,693	+/-631
15 to 17 years	3,476	+/-655
18 and 19 years	2,029	+/-534
20 to 24 years	4,158	+/-790
25 to 29 years	2,782	+/-618
30 to 34 years	3,343	+/-661
35 to 44 years	6,198	+/-1,057
45 to 54 years	5,153	+/-666
55 to 64 years	4,068	+/-563
65 to 74 years	1,463	+/-295
75 to 84 years	1,362	+/-499
85 years and over	121	+/-75
Female:	46,437	+/-1,662
Under 5 years	4,166	+/-477
5 to 9 years	3,782	+/-511
10 to 14 years	3,726	+/-532
15 to 17 years	2,881	+/-535
18 and 19 years	1,857	+/-434
20 to 24 years	3,428	+/-584
25 to 29 years	3,591	+/-720
30 to 34 years	2,976	+/-468
35 to 44 years	6,539	+/-741
45 to 54 years	5,736	+/-620
55 to 64 years	4,063	+/-634
65 to 74 years	2,491	+/-582
75 to 84 years	980	+/-311
85 years and over	221	+/-162

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate and its variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. This margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. Due to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined in the 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban areas in the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sample representativeness is not appropriate.
