

**B15002. SEX BY EDUCATIONAL ATTAINMENT FOR THE POPULATION 25 YEARS AND OVER -
Universe: POPULATION 25 YEARS AND OVER**Data Set: [2007 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	421,818	+/-2,623
Male:	216,408	+/-2,277
No schooling completed	1,428	+/-566
Nursery to 4th grade	871	+/-471
5th and 6th grade	2,172	+/-766
7th and 8th grade	3,715	+/-869
9th grade	1,809	+/-615
10th grade	3,998	+/-965
11th grade	4,077	+/-812
12th grade, no diploma	3,540	+/-894
High school graduate (includes equivalency)	67,650	+/-3,714
Some college, less than 1 year	15,360	+/-1,702
Some college, 1 or more years, no degree	40,024	+/-2,947
Associate's degree	18,242	+/-2,364
Bachelor's degree	31,211	+/-2,187
Master's degree	14,329	+/-1,676
Professional school degree	4,644	+/-948
Doctorate degree	3,338	+/-912
Female:	205,410	+/-1,541
No schooling completed	775	+/-366
Nursery to 4th grade	1,284	+/-451
5th and 6th grade	2,904	+/-824
7th and 8th grade	3,119	+/-731
9th grade	1,774	+/-584
10th grade	2,792	+/-746
11th grade	3,942	+/-931
12th grade, no diploma	1,936	+/-667
High school graduate (includes equivalency)	59,791	+/-3,089
Some college, less than 1 year	16,541	+/-1,714
Some college, 1 or more years, no degree	36,784	+/-2,289
Associate's degree	17,683	+/-1,803
Bachelor's degree	36,543	+/-2,525
Master's degree	14,998	+/-1,615
Professional school degree	2,976	+/-627
Doctorate degree	1,568	+/-595

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census

2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
