B14004. SEX BY COLLEGE OR GRADUATE SCHOOL ENROLLMENT BY TYPE OF SCHOOL BY AGE FOR THE POPULATION 15 YEARS AND OVER - Universe: POPULATION 15 YEARS AND OVER
Data Set: 2007 American Community Survey 1-Year Estimates
Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

	Alaska	
	Estimate	Margin of Error
Total:	537,579	+/-1,393
Male:	281,531	+/-1,691
Enrolled in public college or graduate school:	17,259	+/-2,195
15 to 17 years	232	+/-232
18 to 24 years	8,236	+/-1,584
25 to 34 years	5,094	+/-1,112
35 years and over	3,697	+/-1,029
Enrolled in private college or graduate school:	3,527	+/-969
15 to 17 years	0	+/-237
18 to 24 years	1,038	+/-621
25 to 34 years	756	+/-562
35 years and over	1,733	+/-595
Not enrolled in college or graduate school:	260,745	+/-2,892
15 to 17 years	18,941	+/-1,240
18 to 24 years	36,676	+/-2,354
25 to 34 years	44,465	+/-2,126
35 years and over	160,663	+/-2,489
Female:	256,048	+/-1,625
Enrolled in public college or graduate school:	20,048	+/-1,865
15 to 17 years	25	+/-50
18 to 24 years	8,361	+/-1,396
25 to 34 years	4,697	+/-989
35 years and over	6,965	+/-1,048
Enrolled in private college or graduate school:	4,381	+/-1,055
15 to 17 years	0	+/-237
18 to 24 years	1,234	+/-591
25 to 34 years	1,400	+/-595
35 years and over	1,747	+/-711
Not enrolled in college or graduate school:	231,619	+/-2,955
15 to 17 years	16,022	+/-1,082
18 to 24 years	24,996	+/-1,569
25 to 34 years	38,322	+/-2,212
35 years and over	152,279	+/-1,792

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the

ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
