

**B23005. POVERTY STATUS IN THE PAST 12 MONTHS BY DISABILITY STATUS BY
EMPLOYMENT STATUS FOR THE POPULATION 20 TO 64 YEARS - Universe: POPULATION 20
TO 64 YEARS FOR WHOM POVERTY STATUS IS DETERMINED**

Data Set: [2007 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska		
	Estimate	Margin of Error
Total:	422,185	+/-1,964
Income in the past 12 months below poverty level:	32,822	+/-2,994
With a disability:	8,787	+/-1,402
In labor force:	3,220	+/-880
In Armed Forces	0	+/-237
Civilian:	3,220	+/-880
Employed	1,765	+/-644
Unemployed	1,455	+/-543
Not in labor force	5,567	+/-1,078
No disability:	24,035	+/-2,593
In labor force:	15,416	+/-2,129
In Armed Forces	0	+/-237
Civilian:	15,416	+/-2,129
Employed	10,760	+/-1,767
Unemployed	4,656	+/-1,040
Not in labor force	8,619	+/-1,431
Income in the past 12 months at or above poverty level:	389,363	+/-3,750
With a disability:	50,556	+/-3,582
In labor force:	27,117	+/-2,610
In Armed Forces	251	+/-194
Civilian:	26,866	+/-2,607
Employed	23,520	+/-2,432
Unemployed	3,346	+/-952
Not in labor force	23,439	+/-2,477
No disability:	338,807	+/-4,389
In labor force:	292,827	+/-4,674
In Armed Forces	11,370	+/-1,549
Civilian:	281,457	+/-4,423
Employed	265,812	+/-4,749
Unemployed	15,645	+/-2,008
Not in labor force	45,980	+/-2,970

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the [ACS Subject Definitions](#) for Disability.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to [Labor Force Guidance](#).

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007

Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '‐' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '‐' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
