

B25115. TENURE BY HOUSEHOLD TYPE AND PRESENCE AND AGE OF OWN CHILDREN - Universe: OCCUPIED HOUSING UNITS

Data Set: [2007 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

	Alaska	
	Estimate	Margin of Error
Total:	236,421	+/-2,731
Owner occupied:	149,018	+/-3,290
Family households:	113,149	+/-3,440
Married-couple family:	91,721	+/-3,100
With own children under 18 years	39,902	+/-2,272
No own children under 18 years	51,819	+/-2,041
Other family:	21,428	+/-2,088
Male householder, no wife present:	6,886	+/-1,288
With own children under 18 years	3,545	+/-890
No own children under 18 years	3,341	+/-879
Female householder, no husband present:	14,542	+/-1,628
With own children under 18 years	8,713	+/-1,485
No own children under 18 years	5,829	+/-1,056
Nonfamily households	35,869	+/-2,415
Renter occupied:	87,403	+/-3,597
Family households:	49,196	+/-3,132
Married-couple family:	30,540	+/-2,416
With own children under 18 years	17,597	+/-1,853
No own children under 18 years	12,943	+/-1,815
Other family:	18,656	+/-2,256
Male householder, no wife present:	6,553	+/-1,352
With own children under 18 years	3,917	+/-1,033
No own children under 18 years	2,636	+/-793
Female householder, no husband present:	12,103	+/-1,661
With own children under 18 years	9,295	+/-1,670
No own children under 18 years	2,808	+/-689
Nonfamily households	38,207	+/-2,666

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
