Source: Statistics Finland

1. The longitudinal Census data file 1970-2000 covers all the persons who have been included in different censuses during the period 1970-2000.

2. Regional structure of municipalities is at the level 1.1.2008, counties included. There has been no change in municipalities since 1980 in the arctic regions.

3. The data source of years 1980 and 1985 is the Longitudinal Census Data File 1970-2000. The years 1987-1997 are from the Longitudinal Employment Data File (founded 1987). The years 1998-2007 are from annual employment data files.

4. All these data files covers the whole population (they are not the sample studies).
