

**B18104. SEX BY AGE BY COGNITIVE DIFFICULTY - Universe: CIVILIAN NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER**

Data Set: [2008 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

Alaska		
	Estimate	Margin of Error
Total:	607,460	+/-2,805
Male:	306,835	+/-2,648
5 to 17 years:	65,511	+/-1,564
With a cognitive difficulty	2,524	+/-704
No cognitive difficulty	62,987	+/-1,696
18 to 34 years:	84,325	+/-3,055
With a cognitive difficulty	3,476	+/-1,044
No cognitive difficulty	80,849	+/-3,234
35 to 64 years:	133,862	+/-2,532
With a cognitive difficulty	5,201	+/-1,224
No cognitive difficulty	128,661	+/-2,767
65 to 74 years:	15,814	+/-715
With a cognitive difficulty	1,254	+/-508
No cognitive difficulty	14,560	+/-742
75 years and over:	7,323	+/-667
With a cognitive difficulty	1,348	+/-494
No cognitive difficulty	5,975	+/-721
Female:	300,625	+/-1,902
5 to 17 years:	63,296	+/-1,358
With a cognitive difficulty	2,098	+/-729
No cognitive difficulty	61,198	+/-1,678
18 to 34 years:	78,834	+/-1,426
With a cognitive difficulty	3,330	+/-1,221
No cognitive difficulty	75,504	+/-1,744
35 to 64 years:	133,917	+/-1,602
With a cognitive difficulty	6,322	+/-1,219
No cognitive difficulty	127,595	+/-2,007
65 to 74 years:	15,146	+/-916
With a cognitive difficulty	769	+/-346
No cognitive difficulty	14,377	+/-953
75 years and over:	9,432	+/-800
With a cognitive difficulty	1,832	+/-734
No cognitive difficulty	7,600	+/-753

Source: U.S. Census Bureau, 2008 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2008 American Community Survey (ACS) data generally reflect the November 2007 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2008 Puerto Rico Community Survey (PRCS) data generally reflect the November 2007 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An "\*\*\*\*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An "!" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An "!" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An "!" following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An "\*\*\*\*" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An "\*\*\*\*\*" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
