1.50 persons or more	1,375	1,065	810	45	210	0	0	310

Note(s) :

i. Census metropolitan areas and census agglomerations crossing provincial boundaries

There is one census metropolitan area (Ottawa - Gatineau) and three census agglomerations (Campbellton, Hawkesbury and Lloydminster) that cross provincial boundaries. The data for their respective provincial parts are included with the appropriate census metropolitan area or census agglomeration, with data for the census metropolitan area or census agglomeration within the province of the provincial part that contributes the majority of the population to the area. For example, Ottawa - Gatineau can be found in Ontario, Campbellton in New Brunswick, Hawkesbury in Ontario and Lloydminster in Alberta.

1.

Total - Aboriginal and non-Aboriginal identity population

This is a grouping of the total population into non-Aboriginal or Aboriginal population, with Aboriginal persons further divided into Aboriginal groups, based on their responses to three questions on the 2006 Census form.

2.

Total Aboriginal identity population

Included in the Aboriginal identity population are those persons who reported identifying with at least one Aboriginal group, that is, North American Indian, Métis or Inuit, and/or those who reported being a Treaty Indian or a Registered Indian, as defined by the Indian Act of Canada, and/or those who reported they were members of an Indian band or First Nation.

3.

North American Indian single response

Users should be aware that the counts for this item are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements. The extent of the impact will depend on the geographic area under study. In 2006, a total of 22 Indian reserves and Indian settlements were incompletely enumerated by the census. The populations of these 22 communities are not included in the census counts.

4.

Aboriginal responses not included elsewhere

Includes those who identified themselves as Registered Indians and/or band members without identifying themselves as North American Indian, Métis or Inuit in the Aboriginal identity question.

5.

Total - Number of persons per room

This variable reflects the household level characteristic of the person. For example, counts for 'More than one person per room' show the number of persons living in a household with these conditions. Rooms refers to all rooms within a dwelling excluding bathrooms, halls, vestibules and rooms used solely for business purposes.
