1) The figures for the years 2000 to 2008 include persons from 15 to 62 years of age. The figures for the year 2009 include persons from 15 to 63 years of age. The figures for the year 2010 include persons from 15 to 64 years of age. Notice that people born outside Greenland are included. The total labour force therefore differs from the labour force figure usually published. This is due to the fact that unemployment figures include all unemployed people regardless of birthplace. The calculation of the unemployment rate in this table must therefore be based on the total labour force regardless of birthplace. **2)** Average number of unemployed persons per month.
