Footnotes:

1. The business sector covers the whole economy less public administration, non-profit institutions and the rental value of owner-occupied dwellings. Data by industry included in this table correspond to the System of National Accounts' input-output L level of aggregation. The table are built around the Input-Output Industry Classification (IOIC). This one is based on the industrial standard of the day, which is currently the North American Industry Classification System (NAICS) 2002. The IOIC uses a coding scheme that resembles NAICS, but is modified to reflect the hierarchical structure and organization of the IOIC. For more details, see <http://www.statcan.gc.ca/imdb-bmdi/5103-eng.htm>.
2. Provincial and territorial data are available starting in 1997.
5. Total economic activities that have been realized within the country. That covers both business and non-business sectors.
6. The business sector covers the whole economy less public administration, non-profit institutions and the rental value of owner-occupied dwellings. Commercial activities are defined as activities of production of goods or services at a price calculated to cover the costs and yield profits.
7. Non-business sector consists of economic agents who are involved in the production of goods and services that are not intended to be sold at a price calculated to cover the production costs. This sector includes non-profit enterprises, public and para-public institutions, religious and welfare organizations, etc.
8. The estimate of the total number of jobs covers two main categories: employee jobs and self-employed jobs.
14. The North American Industry Classification System (NAICS) is an industry classification system triggered by the North American Free Trade Agreement, that was developed by the statistical agencies of Canada, Mexico and the United States. It is designed to provide common definitions of the industrial structure of the three countries and a common statistical framework to facilitate the analysis of the three economies. NAICS is based on supply side or production oriented principles, to ensure that industrial data, classified to NAICS, is suitable for the analysis of production related issues such as industrial performance. Since 1997, the industry classification system of the System of National Accounts' (SNA) input-output tables is based on NAICS. In the National Accounts industries, the levels of the different classification systems were chosen so as to provide the most detail possible in order to maximize continuity with the previous classification systems developed by Statistics Canada since 1961. Therefore, the greatest level of detail that is available over time occurs at the L level of aggregation, which corresponds, to 105 industries. This L level can also be aggregated to the M level (medium - 56 industries) and to the S level (small - 21 industries). For more details, see <http://www.statcan.gc.ca/imdb-bmdi/5103-eng.htm>.
15. This combines the North American Industry Classification System (NAICS) codes 111, 112.
16. This combines the North American Industry Classification System (NAICS) codes 2212, 2213.
17. Special industry aggregate: corresponds to sections of the North American Industry Classification System (NAICS) code 23.
18. This combines the North American Industry Classification System (NAICS) codes 3112, 3118 and 3119.
19. This combines the North American Industry Classification System (NAICS) codes 313, 314.
20. This combines the North American Industry Classification System (NAICS) codes 3255, 3256 and 3259.
21. This combines the North American Industry Classification System (NAICS) codes 3271, 3272, 3274 and 3279.
22. This combines the North American Industry Classification System (NAICS) codes 3342 to 3346.
23. This combines the North American Industry Classification System (NAICS) codes 3351, 3353 and 3359.
24. This combines business establishments for the North American Industry Classification System (NAICS) codes 48, 49.
25. This combines the North American Industry Classification System (NAICS) codes 487, 488.
26. This combines the North American Industry Classification System (NAICS) codes 491, 492.
27. This combines business establishments for the North American Industry Classification System (NAICS) codes 5152 and 517.
28. This combines the North American Industry Classification System (NAICS) codes 511, 516, 518 and 519.
29. This combines the North American Industry Classification System (NAICS) codes 52, 53 and 55. It excludes the industry of owner-occupied dwellings.
30. This combines the North American Industry Classification System (NAICS) codes 521, 5221.
31. Special industry aggregate: corresponds to sections of the North American Industry Classification System (NAICS) code 5311 and to Input-Output L level code 5A03.
33. This combines the North American Industry Classification System (NAICS) codes 532, 533.
34. This combines the North American Industry Classification System (NAICS) codes 5222, 5223, 523, 5242, 526, 5312, 5313 and 551.
35. This combines the North American Industry Classification System (NAICS) codes 5411, 5412 and 5413.
36. This combines the North American Industry Classification System (NAICS) codes 5414, 5415, 5416, 5417 and 5419.
37. This includes Aboriginal public administration (9141) and international and other extra-territorial public administration (9191).
38. This combines business establishments for the North American Industry Classification System (NAICS) codes 6111, 6112, 6114, 6115, 6116 and 6117.
39. This combines the business establishments for the North American Industry Classification System (NAICS) codes 621, 623 and 624.
40. This combines the business establishments for the North American Industry Classification System (NAICS) codes 8132, 8133, 8134 and 8139.
41. This combines business establishments for the North American Industry Classification System (NAICS) codes 812, 814.
42. This excludes Aboriginal public administration (9141) and international and other extra-territorial public administration (9191).
44. Each year, there are two separate data releases for SNA labour statistics. The first data release, which occurs in May, focuses only on the preliminary estimates for the last year. The second release, which occurs in the fall (November or December), focuses on the revised estimates for the last four years.
