

[B01001C. SEX BY AGE \(AMERICAN INDIAN AND ALASKA NATIVE ALONE\) - Universe: AMERICAN INDIAN AND ALASKA NATIVE ALONE POPULATION](#)

Data Set: [2009 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska		
	Estimate	Margin of Error
Total:	91,953	+/-3,540
Male:	44,723	+/-2,272
Under 5 years	3,308	+/-417
5 to 9 years	4,207	+/-562
10 to 14 years	3,776	+/-536
15 to 17 years	2,683	+/-446
18 and 19 years	2,236	+/-538
20 to 24 years	4,098	+/-814
25 to 29 years	4,371	+/-591
30 to 34 years	2,611	+/-506
35 to 44 years	4,738	+/-881
45 to 54 years	5,363	+/-847
55 to 64 years	4,421	+/-515
65 to 74 years	1,921	+/-401
75 to 84 years	897	+/-292
85 years and over	93	+/-85
Female:	47,230	+/-2,109
Under 5 years	4,088	+/-705
5 to 9 years	3,700	+/-587
10 to 14 years	3,671	+/-682
15 to 17 years	2,793	+/-497
18 and 19 years	2,189	+/-501
20 to 24 years	4,678	+/-750
25 to 29 years	3,225	+/-529
30 to 34 years	3,094	+/-608
35 to 44 years	5,561	+/-649
45 to 54 years	6,554	+/-678
55 to 64 years	4,059	+/-597
65 to 74 years	1,857	+/-443
75 to 84 years	1,525	+/-380
85 years and over	236	+/-110

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
