

B17016. POVERTY STATUS IN THE PAST 12 MONTHS OF FAMILIES BY FAMILY TYPE BY WORK EXPERIENCE OF HOUSEHOLDER AND SPOUSE - Universe: FAMILIES

Data Set: [2009 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE: Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

View the [collapsed version of this table](#). Geographies missing from this table are listed below the table.

	Alaska	
	Estimate	Margin of Error
Total:	159,940	+/-3,646
Income in the past 12 months below poverty level:	9,850	+/-1,365
Married-couple family:	2,625	+/-686
Householder worked full-time, year-round in the past 12 months:	204	+/-204
Spouse worked full-time, year-round in the past 12 months	12	+/-27
Spouse worked part-time or part-year in the past 12 months	40	+/-53
Spouse did not work in the past 12 months	152	+/-195
Householder worked part-time or part-year in the past 12 months:	1,472	+/-459
Spouse worked full-time, year-round in the past 12 months	15	+/-24
Spouse worked part-time or part-year in the past 12 months	961	+/-446
Spouse did not work in the past 12 months	496	+/-255
Householder did not work in the past 12 months:	949	+/-414
Spouse worked full-time, year-round in the past 12 months	132	+/-157
Spouse worked part-time or part-year in the past 12 months	456	+/-310
Spouse did not work in the past 12 months	361	+/-212
Other family:	7,225	+/-1,361
Male householder, no wife present:	1,319	+/-615
Householder worked full-time, year-round in the past 12 months	152	+/-187
Householder worked part-time or part-year in the past 12 months	938	+/-542
Householder did not work in the past 12 months	229	+/-213
Female householder, no husband present:	5,906	+/-1,216
Householder worked full-time, year-round in the past 12 months	662	+/-513
Householder worked part-time or part-year in the past 12 months	3,144	+/-893
Householder did not work in the past 12 months	2,100	+/-688
Income in the past 12 months at or above poverty level:	150,090	+/-3,688
Married-couple family:	116,518	+/-3,220
Householder worked full-time, year-round in the past 12 months:	63,199	+/-3,221
Spouse worked full-time, year-round in the past 12 months	31,540	+/-2,704
Spouse worked part-time or part-year in the past 12 months	19,457	+/-1,780
Spouse did not work in the past 12 months	12,202	+/-1,545
Householder worked part-time or part-year in the past 12 months:	32,308	+/-2,142
Spouse worked full-time, year-round in the past 12 months	13,938	+/-1,700
Spouse worked part-time or part-year in the past 12 months	13,017	+/-1,618
Spouse did not work in the past 12 months	5,353	+/-926
Householder did not work in the past 12 months:	21,011	+/-1,673
Spouse worked full-time, year-round in the past 12 months	7,516	+/-1,242
Spouse worked part-time or part-year in the past 12 months	4,238	+/-846
Spouse did not work in the past 12 months	9,257	+/-1,026
Other family:	33,572	+/-2,634
Male householder, no wife present:	12,461	+/-1,669
Householder worked full-time, year-round in the past 12 months	6,006	+/-1,285
Householder worked part-time or part-year in the past 12 months	4,696	+/-1,050
Householder did not work in the past 12 months	1,759	+/-518
Female householder, no husband present:	21,111	+/-2,081
Householder worked full-time, year-round in the past 12 months	11,008	+/-1,360
Householder worked part-time or part-year in the past 12 months	6,734	+/-1,140
Householder did not work in the past 12 months	3,369	+/-810

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to

sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The universe - families - includes those householders and spouses who were 15 years old and over at the time of the interview. Labor force information was not collected for people under 16 years of age. Therefore, people who were 15 years old at the time of the interview are treated as "did not work in the past 12 months."

While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
