

B25036. TENURE BY YEAR STRUCTURE BUILT - Universe: OCCUPIED HOUSING UNITS

Data Set: [2009 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	236,597	+/-2,353
Owner occupied:	154,337	+/-3,768
Built 2005 or later	5,047	+/-1,036
Built 2000 to 2004	11,910	+/-1,643
Built 1990 to 1999	21,721	+/-2,055
Built 1980 to 1989	46,208	+/-2,739
Built 1970 to 1979	39,202	+/-2,821
Built 1960 to 1969	14,727	+/-1,927
Built 1950 to 1959	10,278	+/-1,483
Built 1940 to 1949	3,043	+/-728
Built 1939 or earlier	2,201	+/-545
Renter occupied:	82,260	+/-3,476
Built 2005 or later	4,871	+/-1,238
Built 2000 to 2004	4,237	+/-1,213
Built 1990 to 1999	8,822	+/-1,543
Built 1980 to 1989	21,192	+/-2,499
Built 1970 to 1979	23,871	+/-2,119
Built 1960 to 1969	8,308	+/-1,382
Built 1950 to 1959	7,044	+/-1,261
Built 1940 to 1949	2,588	+/-678
Built 1939 or earlier	1,327	+/-490

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
