

[B25116. TENURE BY HOUSEHOLD SIZE BY AGE OF HOUSEHOLDER - Universe: OCCUPIED HOUSING UNITS](#)

Data Set: [2009 American Community Survey 1-Year Estimates](#)

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

	Alaska	
	Estimate	Margin of Error
Total:	236,597	+/-2,353
Owner occupied:	154,337	+/-3,768
1-person household:	32,295	+/-2,156
Householder 15 to 54 years	15,242	+/-1,670
Householder 55 to 64 years	8,033	+/-1,099
Householder 65 to 74 years	4,866	+/-930
Householder 75 years and over	4,154	+/-815
2-or-more person household:	122,042	+/-3,477
Householder 15 to 54 years	77,569	+/-3,094
Householder 55 to 64 years	27,488	+/-1,513
Householder 65 to 74 years	11,542	+/-981
Householder 75 years and over	5,443	+/-716
Renter occupied:	82,260	+/-3,476
1-person household:	27,449	+/-2,555
Householder 15 to 54 years	18,544	+/-2,058
Householder 55 to 64 years	5,318	+/-1,003
Householder 65 to 74 years	2,597	+/-809
Householder 75 years and over	990	+/-454
2-or-more person household:	54,811	+/-3,061
Householder 15 to 54 years	48,623	+/-2,898
Householder 55 to 64 years	4,562	+/-1,034
Householder 65 to 74 years	909	+/-416
Householder 75 years and over	717	+/-341

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An "****" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
