

**B18104. SEX BY AGE BY COGNITIVE DIFFICULTY - Universe: CIVILIAN
NONINSTITUTIONALIZED POPULATION 5 YEARS AND OVER**
 Data Set: [2009 American Community Survey 1-Year Estimates](#)
 Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the [official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties](#).

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Alaska		
	Estimate	Margin of Error
Total:	623,300	+/-2,765
Male:	316,081	+/-2,697
5 to 17 years:	65,623	+/-1,387
With a cognitive difficulty	2,438	+/-740
No cognitive difficulty	63,185	+/-1,418
18 to 34 years:	90,271	+/-2,708
With a cognitive difficulty	4,285	+/-1,312
No cognitive difficulty	85,986	+/-3,158
35 to 64 years:	135,900	+/-2,569
With a cognitive difficulty	4,644	+/-1,213
No cognitive difficulty	131,256	+/-2,781
65 to 74 years:	16,465	+/-828
With a cognitive difficulty	942	+/-353
No cognitive difficulty	15,523	+/-796
75 years and over:	7,822	+/-452
With a cognitive difficulty	1,349	+/-399
No cognitive difficulty	6,473	+/-535
Female:	307,219	+/-1,826
5 to 17 years:	62,857	+/-1,274
With a cognitive difficulty	2,052	+/-591
No cognitive difficulty	60,805	+/-1,389
18 to 34 years:	82,525	+/-1,767
With a cognitive difficulty	2,760	+/-1,107
No cognitive difficulty	79,765	+/-1,825
35 to 64 years:	135,031	+/-1,439
With a cognitive difficulty	6,481	+/-1,437
No cognitive difficulty	128,550	+/-1,985
65 to 74 years:	15,466	+/-1,080
With a cognitive difficulty	1,106	+/-454
No cognitive difficulty	14,360	+/-1,042
75 years and over:	11,340	+/-873
With a cognitive difficulty	2,443	+/-672
No cognitive difficulty	8,897	+/-922

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

- Explanation of Symbols:
1. An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
 2. An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
 3. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
 4. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.
 5. An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
 6. An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
