B27002. PRIVATE HEALTH INSURANCE COVERAGE STATUS BY SEX BY AGE - Universe:
CIVILIAN NONINSTITUTIONALIZED POPULATION
Data Set: 2009 American Community Survey 1-Year Estimates
Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

	Alaska	
	Estimate	Margin of Error
Total:	678,081	+/-2,615
Male:	344,335	+/-2,643
Under 6 years:	32,311	+/-1,327
With private health insurance coverage	18,415	+/-1,574
No private health insurance coverage	13,896	+/-1,401
6 to 17 years:	61,566	+/-1,713
With private health insurance coverage	39,992	+/-2,416
No private health insurance coverage	21,574	+/-2,017
18 to 24 years:	41,673	+/-2,292
With private health insurance coverage	23,800	+/-2,325
No private health insurance coverage	17,873	+/-2,186
25 to 34 years:	48,598	+/-2,589
With private health insurance coverage	25,356	+/-2,258
No private health insurance coverage	23,242	+/-2,384
35 to 44 years:	42,004	+/-1,893
With private health insurance coverage	26,251	+/-1,988
No private health insurance coverage	15,753	+/-1,913
45 to 54 years:	52,589	+/-1,546
With private health insurance coverage	37,480	+/-1,858
No private health insurance coverage	15,109	+/-1,758
55 to 64 years:	41,307	+/-1,026
With private health insurance coverage	31,095	+/-1,507
No private health insurance coverage	10,212	+/-1,318
65 to 74 years:	16,465	+/-828
With private health insurance coverage	10,609	+/-961
No private health insurance coverage	5,856	+/-964
75 years and over:	7,822	+/-452
With private health insurance coverage	5,013	+/-601
No private health insurance coverage	2,809	+/-588
Female:	333,746	+/-1,899
Under 6 years:	31,492	+/-1,361
With private health insurance coverage	17,445	+/-1,588
No private health insurance coverage	14,047	+/-1,595
6 to 17 years:	57,892	+/-1,353
With private health insurance coverage	37,191	+/-2,021
No private health insurance coverage	20,701	+/-2,229
18 to 24 years:	37,485	+/-1,340
With private health insurance coverage	20,907	+/-1,857
No private health insurance coverage	16,578	+/-2,227
25 to 34 years:	45,040	+/-1,602
With private health insurance coverage	27,898	+/-2,329
No private health insurance coverage	17,142	+/-1,895
35 to 44 years:	44,730	+/-1,360
With private health insurance coverage	30,004	+/-2,092
No private health insurance coverage	14,726	+/-2,093
45 to 54 years:	53,009	+/-999
With private health insurance coverage	40,643	+/-1,367
No private health insurance coverage	12,366	+/-1,294
55 to 64 years:	37,292	+/-847
With private health insurance coverage	29,139	+/-1,442
No private health insurance coverage	8,153	+/-1,407
65 to 74 years:	15,466	+/-1,080
With private health insurance coverage	9,726	+/-1,108
No private health insurance coverage	5,740	+/-1,092
75 years and over:	11,340	+/-873
With private health insurance coverage	6,627	+/-904
No private health insurance coverage	4,713	+/-953

Source: U.S. Census Bureau, 2009 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of

error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added in 2009 -- please see http://www.census.gov/hhes/www/hlthins/publications/coverage_edits_final.pdf for more details. The corresponding 2008 data table in American FactFinder does not incorporate these edits and is therefore not comparable to this table. Select geographies of 2008 data comparable to the 2009 tables are accessible at http://www.census.gov/hhes/www/hlthins/data/acs/2008/re-run.html.

While the 2009 American Community Survey (ACS) data generally reflect the November 2008 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
