2017

Data as of 1 January. A family is one or more people living at the same address and who have mutual relationships.

Families can be divided into three main types: Couples (married or cohabiting), singles and non-resident children. For couples and single families, the family may consist of one or more resident children in addition to the couple or the single. Children are defined as persons under 18 years of age.

The total per cent does not add up to exactly 100 per cent due to rounding of the figures.

Under review.

Figures taken from Statistics Iceland committee survey on living conditions (EU-SILC). From 1995-1999: Children aged 0-15. From 2000 onwards: Children aged 0-17.
