

[B09010. RECEIPT OF SUPPLEMENTAL SECURITY INCOME \(SSI\), CASH PUBLIC ASSISTANCE INCOME, OR FOOD STAMPS IN THE PAST 12 MONTHS BY HOUSEHOLD TYPE FOR CHILDREN UNDER 18 YEARS IN HOUSEHOLDS - Universe: POPULATION UNDER 18 YEARS](#)

Data Set: [2004 American Community Survey](#)

Survey: American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

[« hide upper and lower bounds](#)

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	187,721	186,876	188,566
Living in household with Supplemental Security Income (SSI), cash public assistance income, or Food Stamps in the past 12 months:	30,007	25,648	34,366
In family households:	29,837	25,487	34,187
In married-couple family households	13,850	11,208	16,492
In male householder, no wife present, family households	6,075	2,643	9,507
In female householder, no husband present, family households	9,912	7,359	12,465
In nonfamily households	170	0	384
Living in household with no Supplemental Security Income (SSI), cash public assistance income, or Food Stamps in the past 12 months:	157,714	153,656	161,772
In family households:	155,959	152,065	159,853
In married-couple family households	115,475	111,418	119,532
In male householder, no wife present, family households	18,582	16,187	20,977
In female householder, no husband present, family households	21,902	18,298	25,506
In nonfamily households	1,755	630	2,880

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a confidence interval. The interval shown here is a 90 percent confidence interval. The stated range can be interpreted roughly as providing a 90 percent probability that the interval defined by the lower and upper bounds contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Explanation of Symbols:

1. An "*" entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
2. An "***" entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.
3. An "-" entry in the estimate column indicates that no sample observations were available to compute an estimate.
4. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An "****" entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An "*****" entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
