

B17001C

**POVERTY STATUS IN THE PAST 12 MONTHS BY SEX BY AGE
(AMERICAN INDIAN AND ALASKA NATIVE ALONE)**
**Universe: American Indian and Alaska Native alone population for whom
poverty status is determined
2010 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns](#).

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	100,154	+/-3,465
Income in the past 12 months below poverty level:	21,841	+/-2,829
Male:	9,557	+/-1,402
Under 5 years	1,444	+/-365
5 years	401	+/-164
6 to 11 years	1,249	+/-479
12 to 14 years	558	+/-264
15 years	232	+/-150
16 and 17 years	337	+/-157
18 to 24 years	997	+/-304
25 to 34 years	1,024	+/-404
35 to 44 years	995	+/-456
45 to 54 years	1,171	+/-408
55 to 64 years	910	+/-334
65 to 74 years	223	+/-152
75 years and over	16	+/-32
Female:	12,284	+/-1,823
Under 5 years	1,490	+/-339
5 years	242	+/-102
6 to 11 years	785	+/-261
12 to 14 years	401	+/-233
15 years	243	+/-167
16 and 17 years	543	+/-261
18 to 24 years	2,504	+/-882
25 to 34 years	1,633	+/-494
35 to 44 years	1,457	+/-619
45 to 54 years	1,962	+/-607
55 to 64 years	589	+/-273
65 to 74 years	268	+/-211
75 years and over	167	+/-145
Income in the past 12 months at or above poverty level:	78,313	+/-3,560
Male:	39,069	+/-2,351
Under 5 years	3,422	+/-673
5 years	802	+/-418
6 to 11 years	4,659	+/-854
12 to 14 years	2,267	+/-687
15 years	899	+/-377
16 and 17 years	1,698	+/-414
18 to 24 years	4,815	+/-780
25 to 34 years	4,774	+/-1,089
35 to 44 years	4,491	+/-730
45 to 54 years	5,208	+/-872

	Alaska	
	Estimate	Margin of Error
55 to 64 years	3,695	+/-540
65 to 74 years	1,471	+/-375
75 years and over	868	+/-177
Female:	39,244	+/-2,294
Under 5 years	3,487	+/-621
5 years	713	+/-386
6 to 11 years	3,983	+/-664
12 to 14 years	2,033	+/-529
15 years	509	+/-242
16 and 17 years	1,322	+/-344
18 to 24 years	4,214	+/-836
25 to 34 years	5,141	+/-746
35 to 44 years	4,298	+/-728
45 to 54 years	6,092	+/-1,026
55 to 64 years	4,046	+/-493
65 to 74 years	2,212	+/-464
75 years and over	1,194	+/-291

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
