

B17010C

POVERTY STATUS IN THE PAST 12 MONTHS OF FAMILIES BY FAMILY TYPE BY PRESENCE OF RELATED CHILDREN UNDER 18 YEARS BY AGE OF RELATED CHILDREN (AMERICAN INDIAN AND ALASKA NATIVE ALONE)

Universe: Families with a householder who is American Indian and Alaska Native alone

2010 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

		Alaska	
	Estimate	Margin of Error	
Total:	21,307	+/-1,743	
Income in the past 12 months below poverty level:	4,495	+/-992	
Married-couple family:	1,042	+/-360	
With related children under 18 years:	719	+/-226	
Under 5 years only	120	+/-150	
Under 5 years and 5 to 17 years	339	+/-162	
5 to 17 years only	260	+/-120	
No related children under 18 years	323	+/-311	
Other family:	3,453	+/-883	
Male householder, no wife present:	1,067	+/-489	
With related children under 18 years:	859	+/-441	
Under 5 years only	72	+/-67	
Under 5 years and 5 to 17 years	269	+/-211	
5 to 17 years only	518	+/-376	
No related children under 18 years	208	+/-186	
Female householder, no husband present:	2,386	+/-712	
With related children under 18 years:	1,875	+/-545	
Under 5 years only	709	+/-422	
Under 5 years and 5 to 17 years	609	+/-308	
5 to 17 years only	557	+/-249	
No related children under 18 years	511	+/-372	
Income in the past 12 months at or above poverty level:	16,812	+/-1,630	
Married-couple family:	9,153	+/-1,290	
With related children under 18 years:	5,760	+/-1,089	
Under 5 years only	806	+/-431	
Under 5 years and 5 to 17 years	1,900	+/-611	
5 to 17 years only	3,054	+/-799	
No related children under 18 years	3,393	+/-649	
Other family:	7,659	+/-1,112	
Male householder, no wife present:	2,265	+/-589	
With related children under 18 years:	1,461	+/-495	
Under 5 years only	187	+/-105	
Under 5 years and 5 to 17 years	204	+/-155	
5 to 17 years only	1,070	+/-499	
No related children under 18 years	804	+/-296	
Female householder, no husband present:	5,394	+/-878	
With related children under 18 years:	4,192	+/-838	
Under 5 years only	653	+/-384	
Under 5 years and 5 to 17 years	979	+/-350	
5 to 17 years only	2,560	+/-737	

	Alaska	
	Estimate	Margin of Error
No related children under 18 years	1,202	+/-412

## Explanation of Symbols:

An '\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling

variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
