

B17016

**POVERTY STATUS IN THE PAST 12 MONTHS OF FAMILIES BY FAMILY TYPE BY WORK EXPERIENCE OF HOUSEHOLDER AND SPOUSE**  
**Universe: Families**  
**2010 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns](#).

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	170,859	+/-4,484
Income in the past 12 months below poverty level:	12,277	+/-1,505
Married-couple family:	3,588	+/-812
Householder worked full-time, year-round in the past 12 months:	466	+/-417
Spouse worked full-time, year-round in the past 12 months	72	+/-95
Spouse worked part-time or part-year in the past 12 months	250	+/-311
Spouse did not work in the past 12 months	144	+/-157
Householder worked part-time or part-year in the past 12 months:	2,034	+/-618
Spouse worked full-time, year-round in the past 12 months	76	+/-107
Spouse worked part-time or part-year in the past 12 months	575	+/-261
Spouse did not work in the past 12 months	1,383	+/-580
Householder did not work in the past 12 months:	1,088	+/-411
Spouse worked full-time, year-round in the past 12 months	48	+/-61
Spouse worked part-time or part-year in the past 12 months	449	+/-218
Spouse did not work in the past 12 months	591	+/-335
Other family:	8,689	+/-1,163
Male householder, no wife present:	1,709	+/-583
Householder worked full-time, year-round in the past 12 months	154	+/-173
Householder worked part-time or part-year in the past 12 months	652	+/-334
Householder did not work in the past 12 months	903	+/-414
Female householder, no husband present:	6,980	+/-1,013
Householder worked full-time, year-round in the past 12 months	276	+/-230
Householder worked part-time or part-year in the past 12 months	3,417	+/-776
Householder did not work in the past 12 months	3,287	+/-850
Income in the past 12 months at or above poverty level:	158,582	+/-4,656
Married-couple family:	124,381	+/-4,730
Householder worked full-time, year-round in the past 12 months:	69,041	+/-4,439
Spouse worked full-time, year-round in the past 12 months	34,054	+/-3,205
Spouse worked part-time or part-year in the past 12 months	18,769	+/-2,144
Spouse did not work in the past 12 months	16,218	+/-2,225
Householder worked part-time or part-year in the past 12 months:	33,516	+/-2,577
Spouse worked full-time, year-round in the past 12 months	15,405	+/-1,972
Spouse worked part-time or part-year in the past 12 months	11,934	+/-1,726
Spouse did not work in the past 12 months	6,177	+/-1,095
Householder did not work in the past 12 months:	21,824	+/-2,474
Spouse worked full-time, year-round in the past 12 months	8,328	+/-1,725
Spouse worked part-time or part-year in the past 12 months	4,691	+/-918
Spouse did not work in the past 12 months	8,805	+/-1,142
Other family:	34,201	+/-2,515
Male householder, no wife present:	12,502	+/-1,832
Householder worked full-time, year-round in the past 12 months	7,373	+/-1,136
Householder worked part-time or part-year in the past 12 months	3,575	+/-981
Householder did not work in the past 12 months	1,554	+/-508

	Alaska	
	Estimate	Margin of Error
Female householder, no husband present:	21,699	+/-2,139
Householder worked full-time, year-round in the past 12 months	11,637	+/-1,801
Householder worked part-time or part-year in the past 12 months	6,144	+/-1,096
Householder did not work in the past 12 months	3,918	+/-864

#### Explanation of Symbols:

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The universe - families - includes those householders and spouses who were 15 years old and over at the time of the interview. Labor force information was not collected for people under 16 years of age. Therefore, people who were 15 years old at the time of the interview are treated as "did not work in the past 12 months."

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
