

B14004

SEX BY COLLEGE OR GRADUATE SCHOOL ENROLLMENT BY TYPE OF SCHOOL BY AGE FOR THE POPULATION 15 YEARS AND OVER

Universe: Population 15 years and over
2010 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns](#).

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	558,161	+/-1,252
Male:	290,598	+/-1,332
Enrolled in public college or graduate school:	16,375	+/-2,285
15 to 17 years	94	+/-96
18 to 24 years	6,511	+/-1,326
25 to 34 years	6,060	+/-1,521
35 years and over	3,710	+/-852
Enrolled in private college or graduate school:	3,423	+/-1,068
15 to 17 years	33	+/-58
18 to 24 years	1,717	+/-950
25 to 34 years	1,079	+/-481
35 years and over	594	+/-287
Not enrolled in college or graduate school:	270,800	+/-2,632
15 to 17 years	16,350	+/-1,305
18 to 24 years	31,629	+/-2,064
25 to 34 years	48,338	+/-1,908
35 years and over	174,483	+/-1,653
Female:	267,563	+/-1,192
Enrolled in public college or graduate school:	23,549	+/-2,861
15 to 17 years	230	+/-356
18 to 24 years	9,818	+/-1,579
25 to 34 years	5,750	+/-1,282
35 years and over	7,751	+/-1,564
Enrolled in private college or graduate school:	6,358	+/-1,580
15 to 17 years	72	+/-115
18 to 24 years	2,551	+/-1,122
25 to 34 years	1,553	+/-689
35 years and over	2,182	+/-930
Not enrolled in college or graduate school:	237,656	+/-3,014

	Alaska	
	Estimate	Margin of Error
15 to 17 years	15,782	+/-1,160
18 to 24 years	22,797	+/-1,507
25 to 34 years	40,910	+/-1,604
35 years and over	158,167	+/-2,016

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The category "Not enrolled in college or graduate school" includes those who were not enrolled in school as well as those who were enrolled in levels other than college or graduate school.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
