2010 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns](#).

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	689,249	+/-1,872
Male:	351,120	+/-2,257
Under 5 years:	27,406	+/-1,004
With a vision difficulty	245	+/-274
No vision difficulty	27,161	+/-1,070
5 to 17 years:	70,661	+/-1,884
With a vision difficulty	753	+/-566
No vision difficulty	69,908	+/-1,870
18 to 34 years:	79,895	+/-1,945
With a vision difficulty	756	+/-499
No vision difficulty	79,139	+/-1,937
35 to 64 years:	148,156	+/-1,728
With a vision difficulty	3,526	+/-823
No vision difficulty	144,630	+/-1,934
65 to 74 years:	17,286	+/-721
With a vision difficulty	578	+/-232
No vision difficulty	16,708	+/-762
75 years and over:	7,716	+/-531
With a vision difficulty	927	+/-400
No vision difficulty	6,789	+/-637
Female:	338,129	+/-1,869
Under 5 years:	26,176	+/-1,031
With a vision difficulty	336	+/-355
No vision difficulty	25,840	+/-1,061
5 to 17 years:	63,741	+/-1,363
With a vision difficulty	394	+/-301
No vision difficulty	63,347	+/-1,413
18 to 34 years:	81,524	+/-1,301
With a vision difficulty	896	+/-504
No vision difficulty	80,628	+/-1,319
35 to 64 years:	139,860	+/-1,332
With a vision difficulty	3,745	+/-954
No vision difficulty	136,115	+/-1,431
65 to 74 years:	16,632	+/-733
With a vision difficulty	1,078	+/-545
No vision difficulty	15,554	+/-751
75 years and over:	10,196	+/-716
With a vision difficulty	1,647	+/-531
No vision difficulty	8,549	+/-836

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
