## SEX BY AGE BY COGNITIVE DIFFICULTY

Universe: Civilian noninstitutionalized population 5 years and over  
2010 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns](#).

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	635,667	+/-2,386
Male:	323,714	+/-2,526
5 to 17 years:	70,661	+/-1,884
With a cognitive difficulty	2,787	+/-844
No cognitive difficulty	67,874	+/-1,963
18 to 34 years:	79,895	+/-1,945
With a cognitive difficulty	3,298	+/-1,099
No cognitive difficulty	76,597	+/-1,998
35 to 64 years:	148,156	+/-1,728
With a cognitive difficulty	4,194	+/-849
No cognitive difficulty	143,962	+/-1,850
65 to 74 years:	17,286	+/-721
With a cognitive difficulty	1,036	+/-454
No cognitive difficulty	16,250	+/-778
75 years and over:	7,716	+/-531
With a cognitive difficulty	930	+/-417
No cognitive difficulty	6,786	+/-577
Female:	311,953	+/-1,715
5 to 17 years:	63,741	+/-1,363
With a cognitive difficulty	1,378	+/-621
No cognitive difficulty	62,363	+/-1,293
18 to 34 years:	81,524	+/-1,301
With a cognitive difficulty	2,337	+/-753
No cognitive difficulty	79,187	+/-1,516
35 to 64 years:	139,860	+/-1,332
With a cognitive difficulty	7,852	+/-1,508
No cognitive difficulty	132,008	+/-1,872
65 to 74 years:	16,632	+/-733
With a cognitive difficulty	905	+/-437
No cognitive difficulty	15,727	+/-750
75 years and over:	10,196	+/-716
With a cognitive difficulty	1,614	+/-476
No cognitive difficulty	8,582	+/-716

### Explanation of Symbols:

An "\*\*\*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
