AGE BY DISABILITY STATUS BY POVERTY STATUS
Universe: Civilian noninstitutionalized population for whom poverty status is determined
2010 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

	Alaska	
	Estimate	Margin of Error
Total:	683,599	+/-2,461
Under 5 years:	52,546	+/-1,179
With a disability:	615	+/-476
Income in the past 12-months below poverty level	272	+/-347
Income in the past 12-months at or above poverty level	343	+/-304
No disability:	51,931	+/-1,272
Income in the past 12-months below poverty level	9,597	+/-1,489
Income in the past 12-months at or above poverty level	42,334	+/-1,878
5 to 17 years:	131,628	+/-1,932
With a disability:	5,554	+/-1,265
Income in the past 12-months below poverty level	819	+/-495
Income in the past 12-months at or above poverty level	4,735	+/-1,135
No disability:	126,074	+/-2,339
Income in the past 12-months below poverty level	13,085	+/-2,250
Income in the past 12-months at or above poverty level	112,989	+/-2,922
18 to 34 years:	159,579	+/-2,366
With a disability:	9,757	+/-1,620
Income in the past 12-months below poverty level	1,986	+/-724
Income in the past 12-months at or above poverty level	7,771	+/-1,477
No disability:	149,822	+/-2,468
Income in the past 12-months below poverty level	20,255	+/-2,506
Income in the past 12-months at or above poverty level	129,567	+/-3,058
35 to 64 years:	288,016	+/-2,143
With a disability:	38,732	+/-3,128
Income in the past 12-months below poverty level	5,686	+/-1,415
Income in the past 12-months at or above poverty level	33,046	+/-2,688
No disability:	249,284	+/-3,320
Income in the past 12-months below poverty level	14,596	+/-1,751
Income in the past 12-months at or above poverty level	234,688	+/-3,540
65 to 74 years:	33,918	+/-1,015
With a disability:	10,711	+/-1,378
Income in the past 12-months below poverty level	783	+/-452
Income in the past 12-months at or above poverty level	9,928	+/-1,393
No disability:	23,207	+/-1,461
Income in the past 12-months below poverty level	1,181	+/-632
Income in the past 12-months at or above poverty level	22,026	+/-1,589
75 years and over:	17,912	+/-951
With a disability:	9,624	+/-1,108
Income in the past 12-months below poverty level	550	+/-308
Income in the past 12-months at or above poverty level	9,074	+/-1,035
No disability:	8,288	+/-976
Income in the past 12-months below poverty level	417	+/-294
Income in the past 12-months at or above poverty level	7,871	+/-976

	Estimate	**Margin of Error**

Source: U.S. Census Bureau, 2010 American Community Survey

Explanation of Symbols:
An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
