Footnotes:

- The business sector covers the whole economy less public administration, non-profit institutions and the rental value of owner-occupied dwellings. Data by industry included in this table correspond to the System of National Accounts' input-output L level of aggregation. The table are built around the Input-Output Industry Classification (IOIC). This one is based on the industrial standard of the day, which is currently the North American Industry Classification System (NAICS) 2002. The IOIC uses a coding scheme that resembles NAICS, but is modified to reflect the hierarchical structure and organization of the IOIC. For more details, see <http://www.statcan.gc.ca/imdb-bmdi/5103-eng.htm>.
- Provincial and territorial data are available starting in 1997.
- Statistics are available starting in 1999, year of the creation of the Territory of Nunavut.
- Total economic activities that have been realized within the country. That covers both business and non-business sectors.
- The business sector covers the whole economy less public administration, non-profit institutions and the rental value of owner-occupied dwellings. Commercial activities are defined as activities of production of goods or services at a price calculated to cover the costs and yield profits.
- Non-business sector consists of economic agents who are involved in the production of goods and services that are not intended to be sold at a price calculated to cover the production costs. This sector includes non-profit enterprises, public and para-public institutions, religious and welfare organizations, etc.
- The estimate of the total number of jobs covers two main categories: employee jobs and self-employed jobs.
- The North American Industry Classification System (NAICS) is an industry classification system triggered by the North American Free Trade Agreement, that was developed by the statistical agencies of Canada, Mexico and the United States. It is designed to provide common definitions of the industrial structure of the three countries and a common statistical framework to facilitate the analysis of the three economies. NAICS is based on supply side or production oriented principles, to ensure that industrial data, classified to NAICS, is suitable for the analysis of production related issues such as industrial performance. Since 1997, the industry classification system of the System of National Accounts' (SNA) input-output tables is based on NAICS. In the National Accounts industries, the levels of the different classification systems were chosen so as to provide the most detail possible in order to maximize continuity with the previous classification systems developed by Statistics Canada since 1961. Therefore, the greatest level of detail that is available over time occurs at the L level of aggregation, which corresponds, to 105 industries. This L level can also be aggregated to the M level (medium - 56 industries) and to the S level (small - 21 industries). For more details, see <http://www.statcan.gc.ca/imdb-bmdi/5103-eng.htm>.
- This combines the North American Industry Classification System (NAICS) codes 111, 112.
- This combines the North American Industry Classification System (NAICS) codes 2212, 2213.
- Special industry aggregate: corresponds to sections of the North American Industry Classification System (NAICS) code 23.
- This combines the North American Industry Classification System (NAICS) codes 3112, 3118 and 3119.
- This combines the North American Industry Classification System (NAICS) codes 313, 314.
- This combines the North American Industry Classification System (NAICS) codes 3255, 3256 and 3259.
- This combines the North American Industry Classification System (NAICS) codes 3271, 3272, 3274 and 3279.
- This combines the North American Industry Classification System (NAICS) codes 3342 to 3346.
- This combines the North American Industry Classification System (NAICS) codes 3351, 3353 and 3359.
- This combines business establishments for the North American Industry Classification System (NAICS) codes 48, 49.
- This combines the North American Industry Classification System (NAICS) codes 487, 488.
- This combines the North American Industry Classification System (NAICS) codes 491, 492.
- This combines the North American Industry Classification System (NAICS) codes 511, 5152, 517, 518 and 519.
