

B25011

TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER

Universe: Occupied housing units
2010 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns](#).

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	254,610	+/-2,804
Owner occupied:	162,785	+/-3,878
Family households:	120,175	+/-4,338
Married-couple family:	98,653	+/-4,332
Householder 15 to 34 years	13,343	+/-1,930
Householder 35 to 64 years	73,374	+/-3,641
Householder 65 years and over	11,936	+/-1,115
Other family:	21,522	+/-2,063
Male householder, no wife present:	8,770	+/-1,377
Householder 15 to 34 years	1,202	+/-497
Householder 35 to 64 years	6,442	+/-1,234
Householder 65 years and over	1,126	+/-392
Female householder, no husband present:	12,752	+/-1,612
Householder 15 to 34 years	1,529	+/-499
Householder 35 to 64 years	8,852	+/-1,331
Householder 65 years and over	2,371	+/-532
Nonfamily households:	42,610	+/-3,126
Householder living alone:	33,202	+/-2,824
Householder 15 to 34 years	1,810	+/-579
Householder 35 to 64 years	22,063	+/-2,453
Householder 65 years and over	9,329	+/-1,265
Householder not living alone:	9,408	+/-1,574
Householder 15 to 34 years	2,401	+/-759
Householder 35 to 64 years	5,873	+/-1,218
Householder 65 years and over	1,134	+/-588
Renter occupied:	91,825	+/-3,849
Family households:	50,684	+/-2,988
Married-couple family:	29,316	+/-2,945
Householder 15 to 34 years	13,878	+/-1,816
Householder 35 to 64 years	14,360	+/-1,885
Householder 65 years and over	1,078	+/-496
Other family:	21,368	+/-2,048
Male householder, no wife present:	5,441	+/-1,280
Householder 15 to 34 years	1,597	+/-555
Householder 35 to 64 years	3,759	+/-1,101
Householder 65 years and over	85	+/-127
Female householder, no husband present:	15,927	+/-1,828
Householder 15 to 34 years	8,362	+/-1,594
Householder 35 to 64 years	7,180	+/-1,527
Householder 65 years and over	385	+/-320
Nonfamily households:	41,141	+/-3,008
Householder living alone:	30,496	+/-2,672
Householder 15 to 34 years	8,204	+/-1,473

	Alaska	
	Estimate	Margin of Error
Householder 35 to 64 years	17,760	+/-2,329
Householder 65 years and over	4,532	+/-1,008
Householder not living alone:	10,645	+/-1,868
Householder 15 to 34 years	6,721	+/-1,345
Householder 35 to 64 years	3,645	+/-1,133
Householder 65 years and over	279	+/-247

Explanation of Symbols:

An '*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
