All educational programmes are included.

All levels of education include 'not allocated by level'.

The expenditure figures represent the total cost of services provided by each type of institution, without regard to sources of funds (whether they are public or private).

Expenditure includes all expenditures - personnel and non-personnel resources.

private:

Private institutions are government-dependent and independent institutions.

per student:

The number of students, used in the calculation of expenditure per student, is counted as the number of students enrolled at the beginning of the school / academic year.

All students are included (no age limitation).
