AMERICAN FactFinder

MEDIAN INCOME IN THE PAST 12 MONTHS (IN 2011 INFLATION-ADJUSTED DOLLARS)
2011 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Subject	Alaska			
	Total		Median income (dollars)	
	Estimate	Margin of Error	Estimate	Margin of Error
Households	257,330	+/-3,380	67,825	+/-1,948
One race--				
White	75.3%	+/-0.9	73,279	+/-1,961
Black or African American	3.0%	+/-0.5	51,302	+/-17,687
American Indian and Alaska Native	11.3%	+/-0.6	43,156	+/-3,057
Asian	3.7%	+/-0.3	58,044	+/-10,627
Native Hawaiian and Other Pacific Islander	0.6%	+/-0.1	56,465	+/-21,768
Some other race	N	N	70,670	+/-32,696
Two or more races	4.9%	+/-0.7	53,045	+/-9,651
Hispanic or Latino origin (of any race)	4.0%	+/-0.5	61,621	+/-15,479
White alone, not Hispanic or Latino	73.0%	+/-0.9	73,356	+/-1,890
HOUSEHOLD INCOME BY AGE OF HOUSEHOLDER				
15 to 24 years	5.8%	+/-0.7	41,007	+/-3,128
25 to 44 years	37.7%	+/-1.0	70,711	+/-3,545
45 to 64 years	42.4%	+/-1.0	76,379	+/-3,128
65 years and over	14.1%	+/-0.6	47,761	+/-4,875
FAMILIES				
Families	173,279	+/-4,602	75,786	+/-2,534
With own children under 18 years	49.9%	+/-1.7	68,715	+/-3,666
With no own children under 18 years	50.1%	+/-1.7	83,650	+/-3,297
Married-couple families	73.5%	+/-1.4	89,241	+/-3,707
Female householder, no husband present	17.5%	+/-1.2	37,901	+/-3,961
Male householder, no wife present	9.1%	+/-0.9	52,210	+/-8,246
NONFAMILY HOUSEHOLDS				
Nonfamily households	84,051	+/-3,827	42,813	+/-2,507
Female householder	44.6%	+/-2.2	39,250	+/-4,188
Living alone	36.8%	+/-2.0	32,133	+/-4,060
Not living alone	7.9%	+/-1.3	75,138	+/-8,189
Male householder	55.4%	+/-2.2	48,876	+/-5,420
Living alone	40.4%	+/-2.4	41,063	+/-2,255
Not living alone	15.0%	+/-2.2	84,144	+/-6,163
PERCENT IMPUTED				
Household income in the past 12 months	24.1%	(X)	(X)	(X)
Family income in the past 12 months	23.7%	(X)	(X)	(X)
Nonfamily income in the past 12 months	23.2%	(X)	(X)	(X)

Explanation of Symbols:
An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
