

B17010C

POVERTY STATUS IN THE PAST 12 MONTHS OF FAMILIES BY FAMILY TYPE BY PRESENCE OF RELATED CHILDREN UNDER 18 YEARS BY AGE OF RELATED CHILDREN (AMERICAN INDIAN AND ALASKA NATIVE ALONE)

**Universe: Families with a householder who is American Indian and Alaska Native alone
2011 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
1	Total:	20,112	+/-1,484
41	Income in the past 12 months below poverty level:	3,561	+/-493
41	Married-couple family:	884	+/-155
	With related children under 18 years:	780	+/-140
	Under 5 years only	51	+/-38
	Under 5 years and 5 to 17 years	463	+/-112
	5 to 17 years only	266	+/-81
	No related children under 18 years	104	+/-71
	Other family:	2,677	+/-477
	Male householder, no wife present:	1,040	+/-420
	With related children under 18 years:	958	+/-405
	Under 5 years only	483	+/-395
	Under 5 years and 5 to 17 years	216	+/-111
	5 to 17 years only	259	+/-171
	No related children under 18 years	82	+/-47
	Female householder, no husband present:	1,637	+/-300
	With related children under 18 years:	1,514	+/-291
	Under 5 years only	289	+/-124
	Under 5 years and 5 to 17 years	743	+/-236
	5 to 17 years only	482	+/-152
	No related children under 18 years	123	+/-92
	Income in the past 12 months at or above poverty level:	16,551	+/-1,383
	Married-couple family:	9,700	+/-1,012
	With related children under 18 years:	5,917	+/-825
	Under 5 years only	745	+/-248
	Under 5 years and 5 to 17 years	1,896	+/-396
	5 to 17 years only	3,276	+/-693
	No related children under 18 years	3,783	+/-695
	Other family:	6,851	+/-879
	Male householder, no wife present:	2,518	+/-598
	With related children under 18 years:	1,591	+/-490
	Under 5 years only	432	+/-297
	Under 5 years and 5 to 17 years	280	+/-112
	5 to 17 years only	879	+/-343
	No related children under 18 years	927	+/-389
	Female householder, no husband present:	4,333	+/-725
	With related children under 18 years:	3,049	+/-621
	Under 5 years only	478	+/-224
	Under 5 years and 5 to 17 years	688	+/-221
	5 to 17 years only	1,883	+/-498
	No related children under 18 years	1,284	+/-394

Explanation of Symbols:

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '**' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
