

B17016

**POVERTY STATUS IN THE PAST 12 MONTHS OF FAMILIES BY FAMILY TYPE BY WORK EXPERIENCE OF HOUSEHOLDER AND SPOUSE**  
**Universe: Families**  
**2011 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
Total:		173,279	+/-4,602
Income in the past 12 months below poverty level:		12,024	+/-1,704
Married-couple family:		3,842	+/-813
Householder worked full-time, year-round in the past 12 months:		513	+/-348
Spouse worked full-time, year-round in the past 12 months		28	+/-42
Spouse worked part-time or part-year in the past 12 months		186	+/-182
Spouse did not work in the past 12 months		299	+/-272
Householder worked part-time or part-year in the past 12 months:		1,552	+/-443
Spouse worked full-time, year-round in the past 12 months		129	+/-108
Spouse worked part-time or part-year in the past 12 months		775	+/-264
Spouse did not work in the past 12 months		648	+/-343
Householder did not work in the past 12 months:		1,777	+/-595
Spouse worked full-time, year-round in the past 12 months		166	+/-117
Spouse worked part-time or part-year in the past 12 months		504	+/-262
Spouse did not work in the past 12 months		1,107	+/-477
Other family:		8,182	+/-1,485
Male householder, no wife present:		2,416	+/-849
Householder worked full-time, year-round in the past 12 months		354	+/-263
Householder worked part-time or part-year in the past 12 months		505	+/-207
Householder did not work in the past 12 months		1,557	+/-795
Female householder, no husband present:		5,766	+/-1,148
Householder worked full-time, year-round in the past 12 months		717	+/-531
Householder worked part-time or part-year in the past 12 months		2,334	+/-621
Householder did not work in the past 12 months		2,715	+/-800
Income in the past 12 months at or above poverty level:		161,255	+/-4,646
Married-couple family:		123,435	+/-4,083
Householder worked full-time, year-round in the past 12 months:		67,463	+/-4,316
Spouse worked full-time, year-round in the past 12 months		35,562	+/-3,508
Spouse worked part-time or part-year in the past 12 months		18,655	+/-2,103
Spouse did not work in the past 12 months		13,246	+/-1,761
Householder worked part-time or part-year in the past 12 months:		31,423	+/-2,396
Spouse worked full-time, year-round in the past 12 months		15,073	+/-1,825
Spouse worked part-time or part-year in the past 12 months		11,561	+/-1,210
Spouse did not work in the past 12 months		4,789	+/-946
Householder did not work in the past 12 months:		24,549	+/-1,820
Spouse worked full-time, year-round in the past 12 months		8,695	+/-1,397
Spouse worked part-time or part-year in the past 12 months		5,244	+/-1,339
Spouse did not work in the past 12 months		10,610	+/-1,197
Other family:		37,820	+/-2,584
Male householder, no wife present:		13,328	+/-1,464
Householder worked full-time, year-round in the past 12 months		7,848	+/-1,333
Householder worked part-time or part-year in the past 12 months		3,826	+/-869
Householder did not work in the past 12 months		1,654	+/-622
Female householder, no husband present:		24,492	+/-2,226
Householder worked full-time, year-round in the past 12 months		13,980	+/-1,776
Householder worked part-time or part-year in the past 12 months		6,300	+/-1,255
Householder did not work in the past 12 months		4,212	+/-853

Explanation of Symbols:

An \*\*\*\* entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '!' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+!' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An \*\*\*\*\* entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An \*\*\*\*\* entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The universe - families - includes those householders and spouses who were 15 years old and over at the time of the interview. Labor force information was not collected for people under 16 years of age. Therefore, people who were 15 years old at the time of the interview are treated as "did not work in the past 12 months."

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
