SEX BY AGE BY HEARING DIFFICULTY
Universe: Civilian noninstitutionalized population
2011 American Community Survey 1-Year Estimates

BACK TO ADVANCED :

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
Total:		699,272	+/-1,868
Male:		353,412	+/-2,409
Under 5 years:		27,602	+/-927
With a hearing difficulty		127	+/-105
No hearing difficulty		27,475	+/-935
5 to 17 years:		68,083	+/-1,045
With a hearing difficulty		181	+/-120
No hearing difficulty		67,902	+/-1,039
18 to 34 years:		85,584	+/-2,039
With a hearing difficulty		789	+/-311
No hearing difficulty		84,795	+/-2,000
35 to 64 years:		144,403	+/-1,781
With a hearing difficulty		8,522	+/-1,531
No hearing difficulty		135,881	+/-2,098
65 to 74 years:		18,879	+/-724
With a hearing difficulty		4,711	+/-1,041
No hearing difficulty		14,168	+/-1,142
75 years and over:		8,861	+/-529
With a hearing difficulty		3,486	+/-614
No hearing difficulty		5,375	+/-713
Female:		345,860	+/-1,555
Under 5 years:		26,429	+/-948
With a hearing difficulty		39	+/-55
No hearing difficulty		26,390	+/-951
5 to 17 years:		65,594	+/-1,012
With a hearing difficulty		380	+/-435
No hearing difficulty		65,214	+/-1,066
18 to 34 years:		83,173	+/-1,477
With a hearing difficulty		556	+/-349
No hearing difficulty		82,617	+/-1,463
35 to 64 years:		141,420	+/-1,675
With a hearing difficulty		3,677	+/-657
No hearing difficulty		137,743	+/-1,786
65 to 74 years:		18,371	+/-919
With a hearing difficulty		1,830	+/-605
No hearing difficulty		16,541	+/-1,068
75 years and over:		10,873	+/-414
With a hearing difficulty		2,747	+/-529
No hearing difficulty		8,126	+/-689

Explanation of Symbols:

An "*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
