

B24060

**OCCUPATION BY CLASS OF WORKER FOR THE CIVILIAN EMPLOYED
POPULATION 16 YEARS AND OVER
Universe: Civilian employed population 16 years and over
2011 American Community Survey 1-Year Estimates**

BACK TO ADVANCED SEARCH

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
Total:		344,343	+/-5,706
Management, business, science, and arts occupations:		123,900	+/-5,136
Management, business, and financial occupations:		51,185	+/-3,508
Management occupations		37,701	+/-3,214
Business and financial operations occupations		13,484	+/-1,864
Computer, engineering, and science occupations:		18,041	+/-1,911
Computer and mathematical occupations		4,581	+/-1,052
Architecture and engineering occupations		7,554	+/-1,496
Life, physical, and social science occupations		5,906	+/-1,211
Education, legal, community service, arts, and media occupations:		35,406	+/-2,657
Community and social service occupations		5,813	+/-1,160
Legal occupations		2,602	+/-658
Education, training, and library occupations		23,579	+/-2,339
Arts, design, entertainment, sports, and media occupations		3,412	+/-855
Healthcare practitioners and technical occupations:		19,268	+/-2,491
Health diagnosing and treating practitioners and other technical occupations		13,259	+/-2,044
Health technologists and technicians		6,009	+/-1,505
Service occupations:		58,100	+/-4,395
Healthcare support occupations		7,395	+/-1,408
Protective service occupations:		8,502	+/-1,780
Fire fighting and prevention, and other protective service workers including supervisors		4,881	+/-1,342
Law enforcement workers including supervisors		3,621	+/-1,071
Food preparation and serving related occupations		17,281	+/-2,648
Building and grounds cleaning and maintenance occupations		13,204	+/-2,212
Personal care and service occupations		11,718	+/-1,589
Sales and office occupations:		81,214	+/-4,594
Sales and related occupations		32,607	+/-3,287
Office and administrative support occupations		48,607	+/-3,311
Natural resources, construction, and maintenance occupations:		43,857	+/-3,492
Farming, fishing, and forestry occupations		4,429	+/-843
Construction and extraction occupations		25,375	+/-2,867
Installation, maintenance, and repair occupations		14,053	+/-1,702
Production, transportation, and material moving occupations:		37,272	+/-3,507
Production occupations		14,214	+/-2,056
Transportation occupations		13,849	+/-1,987
Material moving occupations		9,209	+/-1,571
Employee of private company workers:		184,386	+/-5,697

Source: U.S. Census Bureau, 2011 American Community Survey

Explanation of Symbols:

An "*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
