

B25011

TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER
 Universe: Occupied housing units
 2011 American Community Survey 1-Year Estimates

BACK TO ADVANCED SEARCH

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
49 of 49	Total:	257,330	+/-3,380
	Owner occupied:	162,312	+/-3,867
	Family households:	120,105	+/-4,221
	Married-couple family:	95,698	+/-3,809
	Householder 15 to 34 years	13,734	+/-1,965
	Householder 35 to 64 years	67,222	+/-3,070
	Householder 65 years and over	14,742	+/-1,013
	Other family:	24,407	+/-2,115
	Male householder, no wife present:	9,221	+/-1,372
	Householder 15 to 34 years	1,709	+/-753
	Householder 35 to 64 years	6,510	+/-1,126
	Householder 65 years and over	1,002	+/-489
	Female householder, no husband present:	15,186	+/-1,700
	Householder 15 to 34 years	2,692	+/-946
	Householder 35 to 64 years	9,625	+/-1,223
	Householder 65 years and over	2,869	+/-645
	Nonfamily households:	42,207	+/-3,015
	Householder living alone:	33,888	+/-2,663
	Householder 15 to 34 years	3,732	+/-1,046
	Householder 35 to 64 years	20,253	+/-2,295
	Householder 65 years and over	9,903	+/-1,324
	Householder not living alone:	8,319	+/-1,627
	Householder 15 to 34 years	2,356	+/-997
	Householder 35 to 64 years	4,875	+/-1,200
	Householder 65 years and over	1,088	+/-550
	Renter occupied:	95,018	+/-4,471
	Family households:	53,174	+/-3,379
	Married-couple family:	31,579	+/-2,888
	Householder 15 to 34 years	14,271	+/-1,794
	Householder 35 to 64 years	16,348	+/-2,215
	Householder 65 years and over	960	+/-311
	Other family:	21,595	+/-2,150
	Male householder, no wife present:	6,523	+/-1,270
	Householder 15 to 34 years	3,249	+/-928
	Householder 35 to 64 years	3,114	+/-883
	Householder 65 years and over	160	+/-116
	Female householder, no husband present:	15,072	+/-1,697
	Householder 15 to 34 years	7,069	+/-1,115
	Householder 35 to 64 years	7,530	+/-1,374
	Householder 65 years and over	473	+/-343
	Nonfamily households:	41,844	+/-3,183
	Householder living alone:	30,958	+/-2,892
	Householder 15 to 34 years	9,323	+/-1,548
	Householder 35 to 64 years	16,674	+/-2,096
	Householder 65 years and over	4,961	+/-929
	Householder not living alone:	10,886	+/-1,928
	Householder 15 to 34 years	6,291	+/-1,310
	Householder 35 to 64 years	4,404	+/-1,173
	Householder 65 years and over	191	+/-167

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
