

B27004

EMPLOYER-BASED HEALTH INSURANCE BY SEX BY AGE
 Universe: Civilian noninstitutionalized population
 2011 American Community Survey 1-Year Estimates

[BACK TO ADVANCED SEARCH](#)

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
1	Total:	699,272	+/-1,868
57	of Male:	353,412	+/-2,409
57	Under 6 years:	33,525	+/-1,292
	With employer-based health insurance	14,945	+/-1,709
	No employer-based health insurance	18,580	+/-1,510
	6 to 17 years:	62,160	+/-1,391
	With employer-based health insurance	28,272	+/-2,323
	No employer-based health insurance	33,888	+/-2,348
	18 to 24 years:	36,558	+/-1,332
	With employer-based health insurance	16,589	+/-1,918
	No employer-based health insurance	19,969	+/-1,789
	25 to 34 years:	49,026	+/-1,853
	With employer-based health insurance	23,643	+/-2,265
	No employer-based health insurance	25,383	+/-1,862
	35 to 44 years:	43,468	+/-1,474
	With employer-based health insurance	26,619	+/-2,512
	No employer-based health insurance	16,849	+/-2,033
	45 to 54 years:	53,827	+/-1,388
	With employer-based health insurance	31,561	+/-1,974
	No employer-based health insurance	22,266	+/-1,888
	55 to 64 years:	47,108	+/-810
	With employer-based health insurance	30,153	+/-1,483
	No employer-based health insurance	16,955	+/-1,550
	65 to 74 years:	18,879	+/-724
	With employer-based health insurance	9,771	+/-980
	No employer-based health insurance	9,108	+/-1,137
	75 years and over:	8,861	+/-529
	With employer-based health insurance	3,882	+/-621
	No employer-based health insurance	4,979	+/-675
	Female:	345,860	+/-1,555
	Under 6 years:	30,868	+/-1,199
	With employer-based health insurance	11,465	+/-1,457
	No employer-based health insurance	19,403	+/-2,007
	6 to 17 years:	61,155	+/-1,241
	With employer-based health insurance	28,358	+/-2,220
	No employer-based health insurance	32,797	+/-2,181
	18 to 24 years:	33,476	+/-1,036
	With employer-based health insurance	14,510	+/-1,481
	No employer-based health insurance	18,966	+/-1,619
	25 to 34 years:	49,697	+/-1,598
	With employer-based health insurance	24,994	+/-2,003
	No employer-based health insurance	24,703	+/-2,086
	35 to 44 years:	45,740	+/-1,542
	With employer-based health insurance	28,598	+/-1,827
	No employer-based health insurance	17,142	+/-1,876
	45 to 54 years:	52,364	+/-1,319
	With employer-based health insurance	33,032	+/-1,861
	No employer-based health insurance	19,332	+/-1,681
	55 to 64 years:	43,316	+/-783
	With employer-based health insurance	28,797	+/-1,234
	No employer-based health insurance	14,519	+/-1,380
	65 to 74 years:	18,371	+/-919
	With employer-based health insurance	7,742	+/-1,001
	No employer-based health insurance	10,629	+/-919
	75 years and over:	10,873	+/-414
	With employer-based health insurance	4,514	+/-830
	No employer-based health insurance	6,359	+/-727

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The health insurance coverage category names were modified in 2010. See [ACS Health Insurance Definitions](#) for a list of the insurance type definitions.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
