These statistics apply the regional division of 1 January 2013 to the whole time series. Data for annexed municipalities have been combined, with the exception of the sub-area annexing of Längelmäki into Orivesi and Jämsä. The entire population of Längelmäki has been combined with Jämsä in 1992-2005. Hence the data of the time series is not comparable for the regions of Pirkanmaa and Central Finland as well as for the municipalities of Jämsä and Orivesi.

Family type**Cohabiting couple without children**

Cohabiting couples (marriage like relationship) have to be inferred from the Population Information System without knowing the nature of their living together. Cohabiting couples are formed of two spouseless over 18-year-olds of different sex occupying the same dwelling on a permanent basis, provided their age difference is less than 16 years and they are not siblings. The fact that the Population Information System does not indicate whether a person living with a family is a subtenant, makes it more difficult to conclude families. People of the same sex living together are not regarded as cohabiting. Only registered partnerships are recorded in the statistics.
