Northwest Territories / Territoires du Nord-Ouest

Global non-response rate (GNR)⁴ = 16.1 %

Area of residence (10)	Condition of dwelling (4)			
	Total - Condition of dwelling	Regular maintenance only	Minor repairs needed	Major repairs needed
Total - Area of residence: On reserve ⁵	40,800	20,520	12,480	7,800
On reserve ⁶	280	80	115	85
Off reserve	40,520	20,445	12,360	7,710
Total - Area of residence: Inuit Nunangat ⁷	40,800	20,520	12,480	7,800
Inuit Nunangat ⁸	5,745	2,520	1,795	1,430
Nunatsiavut	0	0	0	0
Nunavik	0	0	0	0
Nunavut	0	0	0	0
Inuvialuit region	5,745	2,520	1,800	1,425
Outside Inuit Nunangat	35,055	18,000	10,680	6,375

- Housing suitability and the National Occupancy Standard (NOS) on which it is based were developed by Canada Mortgage and Housing Corporation (CMHC) through consultations with provincial housing agencies.
- Number of persons per room - Refers to an indicator of the level of crowding in a private dwelling. It is calculated by dividing the number of persons in the household by the number of rooms in the dwelling.
- Users should be aware that the estimates associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements in the National Household Survey (NHS). In 2011, there were a total of 36 Indian reserves and Indian settlements that were 'incompletely enumerated' in the NHS. For these reserves or settlements, NHS enumeration was either not permitted or was interrupted before it could be completed, or was not possible because of natural events (specifically forest fires in Northern Ontario). For additional information, please refer to the Aboriginal Peoples Reference Guide, National Household Survey, 2011.
- For the 2011 National Household Survey (NHS) estimates, the global non-response rate (GNR) is used as an indicator of data quality. This indicator combines complete non-response (household) and partial non-response (question) into a single rate. The value of the GNR is presented to users. A smaller GNR indicates a lower risk of non-response bias and as a result, lower risk of inaccuracy. The threshold used for estimates' suppression is a GNR of 50% or more. For more information, please refer to the National Household Survey User Guide, 2011.

'Area of residence: On reserve' refers to the following geographic areas: Indian reserves and settlements (referred to as 'On reserve'), and all other areas (referred to as 'Off reserve'). These geographic areas can be used to show where people, primarily Registered Indians and First Nations people, reside.

'On reserve' includes six census subdivisions (CSDs) types legally affiliated with First Nations or Indian bands, i.e., Indian reserve (IRI), Indian settlement (S-É) (except for the five Yukon settlements of Champagne Landing 10, Klukshu, Two and One-Half Mile Village, Two Mile Village and Kloo Lake), Indian government district (IGD), terres réservées aux Cris (TC), terres réservées aux Naskapis (TK) and Nisga'a land (NL), as well as the northern village of Sandy Bay in Saskatchewan.

[7](#) 'Area of residence: Inuit Nunangat' refers to the four regions of Inuit Nunangat and 'outside Inuit Nunangat.'

Inuit Nunangat is the homeland of Inuit of Canada. It includes the communities located in the four Inuit regions: Nunatsiavut (Northern coastal Labrador), Nunavik (Northern Quebec), the territory of Nunavut and the Inuvialuit region of the Northwest Territories. These regions collectively encompass the area traditionally occupied by Inuit in Canada.

[8](#) Inuit Nunangat is the homeland of Inuit of Canada. It includes the communities located in the four Inuit Land Claim Agreement regions: Nunatsiavut (Northern coastal Labrador), Nunavik (Northern Quebec), the territory of Nunavut and the Inuvialuit region of the Northwest Territories. These regions collectively encompass the area traditionally occupied by Inuit in Canada.
