¹ For the 2011 National Household Survey (NHS) estimates, the global non-response rate (GNR) is used as an indicator of data quality. This indicator combines complete non-response (household) and partial non-response (question) into a single rate. The value of the GNR is presented to users. A smaller GNR indicates a lower risk of non-response bias and as a result, lower risk of inaccuracy. The threshold used for estimates' suppression is a GNR of 50% or more. For more information, please refer to the National Household Survey User Guide, 2011.

² 'Non-immigrant' refers to a person who is a Canadian citizen by birth.

³ 'Immigrant' refers to a person who is or has ever been a landed immigrant/permanent resident. This person has been granted the right to live in Canada permanently by immigration authorities. Some immigrants have resided in Canada for a number of years, while others have arrived recently. Some immigrants are Canadian citizens, while others are not. Most immigrants are born outside Canada, but a small number are born in Canada. In the 2011 National Household Survey, 'Immigrants' includes immigrants who landed in Canada prior to May 10, 2011.

⁴ Includes immigrants who landed in Canada prior to May 10, 2011.

⁵ 'Non-permanent resident' refers to a person from another country who has a work or study permit or who is a refugee claimant, and any non-Canadian-born family member living in Canada with them.

⁶ Includes persons who are stateless. ⁷ 'Canadian citizen by birth' refers to persons who had Canadian citizenship at birth under the provisions of Canadian law.

⁸ 'Canadian citizen by naturalization' refers to persons who were not Canadian citizens at birth but acquired citizenship under the provisions of Canadian law. They are immigrants to Canada who acquired Canadian citizenship through the citizenship application process.

⁹ Includes persons who are stateless.
